Hawaiian Gazette. A COUNTRY

Fete Day Again at Beautiful Moanalna Esta

YOUNG

Response to the General Invitation Sociaty Folk Out in Numbers-

A Charming Party. the Minister of Finance and Mrs. Damon undertook the society experiment of inviting the general public, through honors of the run. the medium of a newspaper note, to attend a reception at Moanalua, the charming country seat of these wellknown Island people. The first function, which was in honor of the officers of the American army and navy, was such a thoroughly satisfactory affair that the same means was adopted to make acquainted in Honolulu Vanity Fair Mr. S. E. Damon and bride, son and daughter-in-law of the Minister of Finance and Mrs. S. M. Damon. The time chosen was on Saturday afternoon last, from 3 to 6. The transportation arrangement was special trains on the Oahu Railway, though scores of those who attended used carriages. Had every member of the community been bidden by card the list as made up so informally could not have been made more representative and in every way pleasant. The outpouring of society people and of citizens who rarely put aside the ordinary callings of life to mingle with devotees of fashion, was very large. The gathering was a testimonial to the popularity of the Minister of Finance and Mrs. S. M. Damon, to the growing fondness for moanalua, and to the interest in Mr. S. E. Damon, a "Punahou boy," and his bride, a fair flower from the old and exclusive circles of Edinburgh. Moanalua was never more inviting. When not in gala dress the estate is restful and fascinating, and as a whole and in detail, has of the estate is grown most carefully be found commonly in the group, as well as hundreds of importations. ly in the rose house, the fern house, the japonica house, the orchid house. being built.

For a reception at Moanalua there is always double provision of music. When the Stars and Strines break from the top of the flagstaff the Hawaiian Government band, under Capt. Berger, breaks into the strains of "The Star-Spangled Banner," and plays throughout the afternoon choice selections. The band is within a special tent. For dancing there is supplied the rollicking, rhythmical, carry-you-along melody of the original Quintette Club, whose members are ever willing to sing and play so long as it pleases the ladies. The dancing is in a large lanal, over the water, and so constructed that the aquid sunshine does not interfere. There were showers at Moanalua on Saturday, but they did not interfere with the fete. The reception proper was held at the main house. After greetings the guests proceeded to the dancing place, or promenade: .bout the grounds, and through the grass houses, or seated themselves beneath trees. It was all without restraint, and it was all most thoroughly enjoyed. "Every- Hay today said that he had no offi- Van Wagner, Antidote and Hympathetbody," simply was there, and every- old communication with Audomondor le's Last were entered every hody was zestful for the taste of the Chaste on the subject of the release of good performer. jockey could not manage her. The flag finally fell on as pretty a start as could be desired. Garteline jumped to the front and the big gray Antidote swerved in behind her, with Sympa-thetic's Last, Venus and Van Wagner bunched well up. At the half Van Wagner and Venus moved up and Garteline dropped back a point. The gray was leading. Into the stretch they flashed. Venus moved up with the leader. Sympathetic's Last passed the leader. Sympathetic's Last passed Garteline, who soon dropped behind. As they neared the last eighth the Maltese cross of Venus' jockey paral-leled the red and white of Antidote Sympathetic's Last pulled up with the leaders. Cries of "Antidote!" "Venus!" "Sympathetic's Last!" were uproar-ious. Under the wire they flashed. Venus winning from Antidote by nose, while Sympathetic's Last was but a head behind the gray.

Summary—Venus, bay m., aged, by Verona-Bellinda—1; Antidote, g. g., aged, by Senator Stanford-Poison-Sympathetic's Last, b. g., aged, Fairplay - Sympathetic — 3. T

1:47 1-5. The seventh and last race was for the Oceanic S. S. Co.'s cup, three-fourths mile dash. As Galety Girl and Seabreeze had been scratched, only to one money on the former was plentiful and in some cases three to one was offered with no takers. They got off well and Amarino hung behind Royalist up to the last eighth. Here there was a change and Amarino flew past the post an easy winner in

Everybody went to the races. At least it seemed so when one glanced over the closely packed throngs of humanity crowded in the grand stands and strung out along the course. Never before, since the banner year of 1896, have so many people passed through the gates to cheer for their favorites. The attendance was thoroughly representative. Scions of social standing touched elbows with the race course tout, and the wealthiest joined in the same pool with the poor enthusiast whose last dollar was up on the result. The shrill tones of the ladies mingled with the hoarse shouts of the sterner sex as they cheered the brave horses on to victory. The melody of the band mingled with the shouts of the talent as they named the mounts that should flash first under the wire. The bright colors of the jockeys, the summer costumes of the ladies, and the waving bunting all lent brilliant color to the scene. Blasted hopes met looks of joy and success Everywhere there was contrast and seeming confusior, yet strict order

The races themselves were worthy the large gathering that came to witness them. The noble animals rushed around the course and flashed under the wire as if they realized that they were the center of all eyes on Honolulu's greatest gala day. The talent took a fall in some instances, but generally managed to recoup in the next. The judges acted with the firmness and decision necessary to clean sport. Everybody was good-natured, even when the fates seemed dead against their choice. At the noon hour the restaurant under the grand stand was the center of attraction. The crowds jostled and elbowed in their desire to fortify the inner man for the contests yet to come. The track was in good condition, and although no records number of considerable advantages went by the board, there was always gained by deep plowing. In the first enough doubt to keep everybody guessing, and to hold the interest. The whole day was a carnival of as well as the water sent in sport, which was enjoyed by all who ditches in the irrigated districts was were present.

The first event was the bicycle race. This was comparatively uninteresting, as the result was certain, and the people were waiting for the horses. "Manoa" won out easily in 2:45.

The second event brought out three horses, Venus, Keana up; Frank S, McAuliffe up, and J R, ridden by Frank. The first named was the favorite, and was heavily backed. The start was poor. Venus getting off four cross astride the bay commenced her and neck. They flew past the Jockey Club stand in even stride, and flashed under the wire in a dead heat. Time, :491/2. The run-off was postponed un til the program was run. Then, as Cunningham refused to enter Frank S. claiming that the race was his by the first heat. Venus cantered around the track, taking first money and all bets. The third race brought out another trio. Red Pike, with Opipio up; Garteline, Keana, and Royallst, Ferreira. faced the starter and got away. They tomehed until the inst quarter, when Garteline took the lead and was pever

headed, finishing three lengths to the

good, with Red Pike second. Time

Col. Macfarlane Will Handle the Fowler.

CENERAL OF.

The Implement Has Found the Fa-t vor of Sugar Beet People-A California Factory.

Col. George W. Macfarlane, whose family name is linked with the history of Hawaii, and who is a man well known in the United States and in England and on the Continent, is to become a pretty good-sized factor in business on the Mainland. The Colonel is to have the general agency for the United States of the famous Fowler steam plows. He will take up this matter as soon as he has seen the First American Bank of Hawaii well established here. Col. Macfarlane is the promoter of this new financial institution. He now awaits the arrival from the coast of some of the other principals, when the enterprise will be launched. This will give Honolulu its fourth bank, and the one that is to become the First National and depository of the United States Government. Its backers include officials of the Southern Pacific, beginning with Collis P. Huntington and Mr. Lillenthal and other connections of the Seligman syndicate. The Honolulu man is justly much elated over the success he has scored in encouraging a new bank for the Islands. There is to be a branch of the institution at Hilo. and one bureau of the business with be a savings and loan concern with heavy capital.

As general agent in the United States for the Fowler steam plows, Col. Macfarlane will handle an agricultural implement well known to these Islands, and a machine that will become better known on the Mainland than it is at present. The Fowler plow people have their best customers in the United States away out in California. The plow has been favored there by the growers of sugar beet. and its use is being recommended by the refinery people everywhere. The system in the production of beet sugar is for the refiner to purchase the beets from the grower, and the manufacturers, often supplying the seeds and advancing money, have almost a direct interest in the success of the farmers.

It was Col. Claus Spreckels who first

suggested to the beet producers of the

coast that they could secure better results by deeper plowing. He had seen the Fowler steam plows in use in the beet fields of Germany and had no hesitation about recommending the implement to the farmers of California. The result was even more satisfactory than had been anticipated. There were a place the water that came from the clouds at once to the fields found to be more than doubled in value. Instead of reaching six inches of soil, it fell upon ground that was eighteen and twenty inches loosened and was fully utilized. Then the beets were no longer stubby. In the deep soil they had the growth that made them, when ripe, look like the pictures of the perfect vegetable. The growers everywhere began to clamor for the plow that could reach such a depth and the refinery people were ready und willing to assist in securing the artilengths behind the other two. As she cle sold by the Fowlers. The plow is came into the stretch the Maltese where on the coast. The men who had owned the bonanza wheat fields up-hill run. Slowly she neared the there thought they had learned of leader, Frank S, and as they went past every field appliance worth having, the last eighth they were almost neck but acknowledged without debate that the Fowler plow was something new. By the use of the Fowler one gang can save much labor and dispense with separate organizations for each estate.

Col. Macfarlane does not propose to change his residence. Hawaii is his home and always will be. He will in a short time from now meet at Ban Francisco one of the partners in the Powler firm. Arrangements will then be made for the sales distribution of the plow on the mainland, for advertising, etc. It may be that the Fowlers will have one or more factories in the United States. In this event one of the plants will be located in California. This establishment would be a favorite house with Island people, as Powler plows are often wanted in a great hur-

The seventh and last race was for the Oceanic S. S. Co.'s cup, three-fourths mile dash. As Galety Girl and Amarino and Royalist were up. to one money on the former was plentiful and in some cases three to one was offered with no takers. They got off well and Amarino hung behind Royalist up to the last eighth. Here winner in

Everybody went to the races. At east it seemed so when one glanced over the closely packed throngs of hunanity crowded in the grand stands and strung out along the course. Never before, since the banner year of 1896, have so many people passed through the gates to cheer for their favorites. The attendance was thoroughly representative. Scions of social standing touched elbows with the race course tout, and the wealthiest joined in the same pool with the poor enthusiast whose last dollar was up on the result. The shrill tones of the ladies mingled with the hoarse shouts of the sterner sex as they cheered the brave horses on to victory. The melody of the band mingled with the shouts of the talent as they named the mounts that should flash first under the wire. The bright colors of the jockeys, the summer costumes of the adies, and the waving bunting all lent brilliant color to the scene. Blasted hopes met looks of joy and success Everywhere there was contrast and seeming confusior, yet strict order ruled.

The races themselves were worthy the large gathering that came to witness them. The noble animals rushed around the course and flashed under the wire as if they realized that they were the center of all eyes on Honolulu's greatest gala day. The talent took a fall in some instances, but generally managed to recoup in the next. The judges acted with the firmness and decision necessary to clean sport. Ev-When they jumped away Harvey's bay the fates seemed dead against their gelding, Red Pike, took the lead, but choice. At the noon hour the restauchoice. At the noon hour the restaurant under the grand stand was the center of attraction. The crowds jostled and elbowed in their desire to fortify the inner man for the contests yet to come. The track was in good condition, and although no records went by the board, there was always enough doubt to keep everybody guessing, and to hold the interest. The whole day was a carnival of sport, which was enjoyed by all who were present.

The first event was the bicycle race. ple were walting for the horses. "Manoa" won out easily in 2:45.

The second event brought out three horses, Venus, Keans up; Frank S. McAuliffe up, and J R, ridden by Frank. The first named was the favorite, and was heavily backed. The lengths behind the other two. As she came into the stretch the Maltese cross astride the bay commenced her Club stand in even stride, and flashed can save much labor and dispense 49%. The run-off was postponed until the program was run. Then, as change his residence. Hawaii is his Conningham refused to enter Frank S. (Continued on Page Five.)

Col. Macfarlane Will Handle

The Implement Has Found the Fa-6 vor of Sugar Beet People-A California Factory.

Col. George W. Macfarlane, whose family name is linked with the history of Hawali, and who is a man well known in the United States and in England and on the Continent, is to become a pretty good-sized factor in business on the Mainland. The Colonel is to have the general agency for the United States of the famous Fowler steam plows. He will take up this matter as soon as he has seen the First American Bank of Hawaii well established here. Col. Macfarlane is the promoter of this new financial institution. He now awaits the arrival from the coast of some of the other principals, when the enterprise will be launched. This will give Honolulu its fourth bank, and the one that is to become the First National and depository of the United States Government. Its backers include officials of the Southern Pacific, beginning with Coltis P. Huntington and Mr. Lillenthal and other connections of the Seligman syndicate. The Honolulu man is justly much elated over the success he has scored in encouraging a new bank for the Islands. There is to be branch of the institution at Hilo, and one bureau of the business with be a savings and loan concern with heavy capital.

As general agent in the United States for the Fowler steam plows, Col. Macfarlane will handle an agricultural implement well known to these Islands, and a machine that will become better known on the Mainland than it is at present. The Fowler plow people have their best customers in the United States away out in California. The plow has been favored there by the growers of sugar beet. and its use is being recommended by the refinery people everywhere. The system in the production of beet sugar is for the refiner to purchase the beets from the grower, and the manufacturers, often supplying the seeds and advancing money, have almost a direct interest in the success of the farmers.

It was Col. Claus Spreckels who first

suggested to the beet producers of the coast that they could secure better results by deeper plowing. He had seen the Fowler steam plows in use in the beet fields of Germany and had no hesitation about recommending the imple ment to the farmers of California. The result was even more satisfactory than had been anticipated. There were a number of considerable advantages gained by deep plowing. In the first place the water that came from the clouds at once to the fields as well as the water sent in ditches in the irrigated districts was found to be more than doubled in value. Instead of reaching six inches of This was comparatively uninteresting, soil, it fell upon ground that was as the result was certain, and the peo- eighteen and twenty inches loosened and was fully utilized. Then the beets were no longer stubby. In the deep soil they had the growth that made them, when ripe, look like the pictures of the perfect vegetable. The growers everywhere began to clamor for the plow that could reach such a depth and the refinery people were ready and start was poor, Venus getting off four willing to assist in securing the article sold by the Fowlers. The plow is a revelation to agriculturists everywhere on the coast. The men who had cross astride the bay commenced her owned the bonanza wheat fields up up-hill run. Slowly she neared the there thought they had learned of leader, Frank S, and as they went past every field appliance worth having, the last eighth they were almost neck but acknowledged without debate that and neck. They flew past the Jockey the Fowler plow was something new. under the wire in a dead heat. Time, separate organizations for each estate.

Col. Macfarlane does not propose to home and always will be. He will in The third race brought out another the plow on the mainland, for advertising, etc. It may be that the Powlers will have one or more factories in the This establishment would be a favorite house with Island people, as Powler plows are often wanted in a great hur-

AT A RARE TREAT

Papalarity of the Recitalist is Established at Once.

OTHELLO WAS WELL RENDERED

First Appearance of Hannibal A. Williams at the Y. M. C. A. Unique and Effective Work.

(From Saturday's Dally.)

A rare treat was the recital given by Hannibal A. Williams at the Y. M. C. A. last evening. The audience reveled in the exquisite interpretation of Shakespeare's sublime tragedy, "Othel- Pepeekeo, 9600 bags; Hilo Sugar Com- en from the Washington Press, publo, the Moor." It would be difficult to finagine the powers of portrayal pos- from O. A. Steven 15 bags of coffee. sessed by Mr. Williams. From the deep-sounding voice of the Moor he She carried as passengers R. H. Glaze rang the changes through all the characters up to the sweet modulated tones of Desdemona. The various emotions, from the serpentine trickery and knavery of Iago to the womanly tenderness of Desdemona, were clearly brought

Mr. Williams opened the recital with a brief summary of the tragedy for an introduction. Then as he brought in the different characters he informed the audience as to their identity. This was only necessary the one time, as afterwards the vocal change was sufficient to make known the person speaking.

The scenes where Othello relates the means be used to win Desdemona's love, and where he comes to his tragic end were perhaps the best of the evening. Of all the characters assumed that of Othello stood out for its foreible interpretation. The only criticism in regard to any of them was that the crafty cruelty of lago was hardly fully portrayed.

The facial expression and the ease with which nearly the whole of the five-act tragedy was given without any outside aid was marveled at.

The attendance was large despite counter attractions. The audience thoroughly appreciated the entertainment and all had only words of praise for it.

Tuesday evening-A Midsummer Night's Dream

"E. ALLEN."

The Young Man Kept Himself Prominent at Oakland.

A San Francisco paper says that E. Allen Sherman, as president of the Christian Endeavor Union of Alameda county, in 1895, achieved notoriety for himself by demanding from the Police Commissioners the dismissal of the then Chief of Police, Louis A. Schaffer. His request was based upon a petition signed by himself as president and W. Gardner as secretary of the Endeavor Society, in which charges were made that Chief Schaffer was in league with gamblers and the criminal element of Oakland, and that he was the official protection of the saloons, dives and gambling dens of that city. The accusations caused a decided stir. Schaffer retaliated by having Sherman arrested on a charge of criminal libel, which was subsequently dismissed.

Later in the same year the young man again came into prominence by engaging in a heated controversy with Rev. Dr. Coyle of the Presbyterian Church at a meeting of the Christian iter's department was adopted. Endeavor Union, in which each challenged the veracity of the other. The trouble caused a split in the union building between Queen and Nuuanu and it afterward developed that the streets, was referred to the survey dereverend gentleman sent his daughter department. East to escape the amorous attentions of the young lawyer. Sherman admitted his affection for Miss Coyle and openly charged that her father's the clergyman's disapproval of an intimacy which bid fair to result in a

TRADE RECIPROCITY

NEW YORK, May 31.-A dispatch to the Herald from Kingston, Jamaica, mays: The Legislature today decided to discuss reciprocity arrangements. They will go with clear instructions from Mr. Chamberlain that reciprocity cannot be entertained if an appreciable loss of revenue be involved, as argonauts of the '50's. appears to him inevitable. The Governor announced later that he was opening up correspondence with the Canadian Government to establish quick steamably service between Canuda and Jamaica for the development

Was Champion at Lahainn-A Gold Medalist - Shows Some Schuetzen Club Men a Good Rye.

Mr. C. F. Horner, formerly manager of the Pioneer Mill Company's sugar plantation, and president of the La-HILO, June 8.—Hawaii Herald: The bains rifle team, has recently achievbark Rhoderick Dhu in the Matson ed new honors as a marksman. When he left Lahaina three years ago he yesterday morning with a full cargo carried with him the club's gold medal which he had won in three contests.

His multitude of friends at Lahaina and in other parts of the Islands will be gratified to read the following takpany, 7896; Hakalau, 16,040 bags, and lished at Irvington, California, April

> Four members of the C. A. C. Rifle Club attended the annual Schuetzenfest of the California Schuetzen Club on Sunday, and will long remember the event, as they were the guests of the club, and were royally entertained. The party consisted of C. F. Horner, C. W. Riser, R. D. Blacow and R. E. Smith. They were met at the boat by Mr. Philo Jacobi, president of the club, who took them in hand, and were right royally entertained by the "daddy" of the rifle shooters of the coast. Upon arriving at the grounds they were presented to the leading shooters of the State, who were present in large numbers.

Shooting began at 9:30 in the morning, and not until 6 o'clock did the last shot ring out the close of one of the most interesting contests that the club has ever held. Three of our home men participated in the shoot, and made the following scores: C. F. Horner, 69; R. D. Blacow, 59, C. W. Riser, 51. When the announcement was made that C. F. Horner had made the phenomenal score of 69 points with an open-sight Winchester rifle, it brought forth rounds of applause With the same rifle he scored 73 on the ring or public target, thereby add-In consequence of his fine shooting he will be entitled to the ninth prize out of one hundred prizes offered. Most all of the shooters used what is known as the "peep-sight," which gives them

NO WAR SHIP BIDS.

WASHINGTON, May 31.—Bids were to have been opened by the Navy Department today at noon for armored cruisers now authorized by law, but none was received within the price fixed by Congress.

The Carnegie Steel Company and the Bethlehem Iron Company submitted furnish armor of the character required at the price fixed by Congress. Burnstine Brothers, of San Francisco, which, however, is above the limit fixed by Congress. This limit was \$400 for the seven ships authorized last year and \$300 for the ships authorized this year.

DEWEY PRAISES HOBSON.

NEW YORK, May 30 .- A cable to he World from Hongkong says: Admiral Dewey seldom discusses men or events of the Spanish war, but now and then he says things full of pith and point. He allowed himself to talk of some of the affairs in the Cuban campaign today. Speaking of the Merrimae affair at Santiago the hero of Manila said of Lieut. Hobson: "I like him. He is a brave man, dignis fied and modest. The trouble about Hobson is that he takes life too seriously, and is bashful,"

HOOLEY IMMUNE

LONDON, May 30 .- The Public Pros ecutor announced today that he would not proceed with the prosecution of Together Capt. Whitney and Stratton Ernest Terah Hooley, the corporation promoter and speculator, upon the charge of fraud.

Do Your Joints Pain You?

A slight indefinite pain in the joints is the first sign of Rheu-matism. Then come the aching pains and tenderness, the agonizing cramps, the fever and restlessness that characterize

When you feel the first slight pain, begin to take Dr. Williams' Pink Pills for Pale People, and the progress of the disease will be arrested. Neglect this and you will regret it.

Dr. Williams' Pink Pills for Pale People are a Positive and Permanent Cure for Rheumatism.

This remedy expels impurities from the blood, and supplies the material for rapidly rebuilding wasted nerve tissues. It has performed hundreds of almost miraculous cures in severe cases of Rheumatism, many times after doctors had given up hope. Read this sworn statement:

tors had given up hope. Read this sworn statement:

"In 1880 I was taken with rheumatism, which began in my hips and gradually spread throughout my body. For two years and a haif I was confined to my bed, employed nine of the best physicians in Albany, and two specialists from New York city. They all declared my case hopeless, and finally told me that I had but six weeks to live. I told them to take their medicine away; that if I were to die I should take no more of the stuff.

My niece, who through her friends knew of the good results attending the use of Dr. Williams Pink Pills for Pale People, strongly recommended them. She procured the pills and by the time I had used the first box I feit hungry. Having had no appetite for a long time, I knew that the pills were doing me good. I continued their use, and after taking several boxes was able to leave my bed and go about with the use of crutches. I weighed but 139 pounds. As my normal weight is about 269 pounds, you can see how run down I had become during my sickness. After taking thirteen boxes of the pills I was weighed again, and although less than a year had passed I weighed 207 pounds. I continued the use of the pills and finally was able to absenden the crutches altogether, and am now as well as ever." MAT TANNER, 2011 Albany, N.Y.

Sworn to and subscribed before me this 17th day of September, 1888. NELLE F. Towner, Notary Public, Albany, O., N.Y.

TALK FOR MONEY lars and not feel it. That only is THE WHITE MAN

Rev. J. A. Cruzan's Appeal for Mission Funds.

Real Giving-Sacrifice Must Be Involved-Several Anecdotes-A Test Case Recounted.

(From the sermon of Rev. J. A. Cruzan at the Home Mission rally, Central Union church, June 4, 1899.)

The conversion of the world, of Hawall, is not a question of men, but of money. The consecrated men and women stand ready to obey the Master's command. And Christian men and President and Mrs. Dole at the Exec women have the money to send them. utive mansion on Emma street. America is the richest nation in the world; English-speaking Hawaii is his wife met a small company of leadthe richest part of that richest nation. ing people at a dinner given by Mr. Not long since a keenly observant English visitor told us, in the chastely severe dialect of his native island that "Americans are too beastly prosperous!" We understood him without difficulty. We knew that he told the truth. And that is also true of English-speaking Hawali. We have no lack of money. What we lack is the Gen. Greely Buys a Trio consecration of our money.

We owe this to God. We are not our own. All that we have and own belong to Him. And this is as true of the poor man's dollar as it is of the rich man's Two Heavy and One Light-For Im millions. We should change the form of our question. We ask, "How much ought I to give to the Lord's work?" We ought to ask, "How much of my Lord's money ought I to use for myself?" Such a change of questions would change the lives of some Christians, as for example, that churchman of whom Bishop Potter tells who gives \$5 per year to missions and \$800 a season for an opera box. It would change as radically the lives of some poor men, who give nickels with an air that

"When we asunder part it gives us inward pain, But we shall still be joined in heart and hope to meet again."

We owe this consecration of our money to our fellow men. With sublime confidence Jesus committed the redemption of the race to his church. It is an awful responsibility. It has not been met as it ought. Sixty generations, a vast host of at least thirty billions unevangelized heathen have since he gave that commission to His church.

We are not responsible for the past, but we are responsible for the present, We are responsible for the evangeliza- ters, or when not needed for this work tion of the remnant of the Hawaiian race, for the thousands of laborers on our plantations, out of whose toil we are making immense fortunes. How we going to answer to Almighty God for these heathen men and wo-What shall we do, in the day of account, with the silver, and the gold, that we have withheld from the Lord's

We owe the consecration of our day is in danger of perishing in luxury and worldliness. The reason why so many Christians have only a name to live is that they are sponges fastened but never giving out. In all life using essential to gaining. It is a universal law that we get only by giving. "He that loseth his life shall find it." The law of self-preservation demands that you think, plan, give, live for others. You dwarf your life just to the cargo steamer built for the Manchester degree that you limit your sympathy line running to Canada. The Manto yourself, your family, your com-munity. Mr. Lydgate tells us that some Kaual Christians will give only for work on that island. That type of placement. She has three decks, nine Christian is not confined to Kauai. He water-tight compartments, all extendlives on Maui, Hawaii, even in Hilo. He is like the wealthy man who never gave for anything, who astonished his neighbors by making a ilberal dona-tion for a town clock. When asked the reason, he said: "I give my money only where I can hear it tick!" Such a narrow, selfish outlook brings spiritual stagnation, atrophy, paralysis, death. The love and self-sacrifice you put in-to any good cause comes back to you in moral strength, growth, grace and beauty.

It is written of Jesus that "For the joy that was set before Him He went to Calvary." The joy of self-sacrifice! There is none other so sweet. A few find it in giving. More than fifty years ago Nathaniel Cobb, in his Boston counting room, wrote this cove-nant: "By the grace of God I will never be worth more than \$50,000. By the grace of God I will give one-fourth of the net profits of my busi-ness to charitable and religious uses. if I am ever worth \$20,060 I will give one-half my profits; if I am ever worth \$30,000 I will give three-fourths, and the whole after \$50,000. So help me boring plant on Lanal, sent the news God! or give to a more faithful stew-by whaleboat to Mr. Hayselden, at Laard and set me aside!" God tested and tried him, but Nathaniel Cobb stood the test. He died worth a little less he went through twenty-seven inches twenty years in the tropics, says in a than \$50,000. On his death-bed he of water-bearing strata, and had recent article that the white man can How good God has been to me! stand how a Christian man can die ness about it. After a severe test with worth a million dollars. I should the pump, Mr. Wesels gave it as his think he would feel like old Dr. Emporation that it would supply 2,000,000 mons. mediate and Varied Use in the Field -Du licate Batteries

WASHINGTON .- Gen. Greely, Chief of the United States Signal Service. has awarded a contract for three electric automobile telegraph and balloon wagons to be used by the Signal Corps. Each automobile will cost about \$1800 and \$1500 added for extra batteries.

The specifications of the contract provide that two shall be suitable for heavy work and one for light work. It is proposed to use them in conjunction with balloon work and experiments to be conducted in the Marconi system of wireless telegraphy. The heavy automobiles are to carry not less than 800 pounds, not including the driver, and to be charged with electricity to run not less than twelve miles without recharging. It is proposed to use the heavy wagons for gone to the judgment seat of Christ general delivery or emergency work. They are to be so arranged that at any time they can be reconverted into Signal Corps stations, with telegraph lines running to military headquarto carry batteries for general service in the field.

The light wagon will be built to carry not less than four persons, nad will be fitted with a switchboard, the same as others. Its minimum radius be twelve miles. Each vehicle is to potism, and pacific activities always to be supplied with duplicate batteries, money to ourselves. The church to- and so fitted that it can be drawn by

If he does not work, it is slupply for nore than \$200,000." I cannot underness about it. After a severe test with the pump, Mr. Wesels gave it as his

IN THE TROPICS

The thesis of Benjamin Kidd, in his ecent book on "The Control of the Tropics," that the white races cannot live and form self-governing communities in hot climates, is regarded by the editor of Appleton's Popular Science Monthly as equivalent to the proposition that freedom is limited by climate, and against this he protests, as an assertion directly contrary to all the generalizations of modern social science. Mr. Kidd, it will be remem bered, points out that, although the white man cannot live permanently in the tropics, he must control them; and hence he gives aid and comfort to the American expansionist. Of this view the writer of the editorial says: "Whether Mr. Kidd recognizes the

edious significance of his captivating speculation or not, it is certainly a plea and an apology for slavery and political despotism in the tropics. There is reason to believe that it must be relegated to the limbo of a kindred and popular superstition. Within the past year much has been said about the genius of the Anglo-Saxon for freedom and the ethnic incapacity of the Latins for that boon of civilization. Even so great a scholar as Guizot encourages this extraordinary theory.

. . In apology for his misinterpretation of social phenomena there can be urged his ignorance of the law of evolution and of the hardly less important law of the militant origin of freedom. No such apology can, however, be made in behalf of Mr. Kidd, or of any other apostle of imperialism. Not only have they at command all the generalizations of social science, but all the facts upon which those generalizations are based, to prove that neither climate nor race is a limitation upon freedom.

"If climate determined the character of the political institutions of a people, many questions would be suggested at once that would be beyond solution. Why, for instance, should a certain freedom have existed in Athens, and the most intolerable despotism in Sparta? Again, why should there be despotism in Russia and Germany, as well as in Morocco and Egypt? Another series of questions equally perplexing can be raised. Why should there be more freedom in England today than six hundred or even one hundred years ago? The climate has not changed in the interval. Why should the institutions of Spain in the thirteenth century have been more liberal than in the seventeenth? Why was it that the freedom which existed in Germany before the Thirty Years' War had virtually ceased to exist at the Peace of Westphalia? Here, also, the . . The climate had not changed. . only satisfactory answer to these questions is to be found in the fact that of action without recharging will also militant activities always lead to desfreedom. When people get into war,

the central power must exercise all the

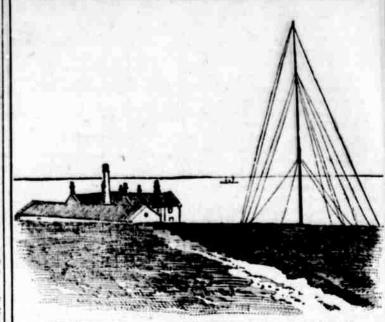

authority over life and property essen-

tial to success in battle. . . "Whether despotism exists, as Mr. Kidd and his followers assume, among all the indigenous populations of the tropics, only a careful investigation of the subject would permit one to say. But that it must, as they contend, alsocial evolution give the slightest warrant. Wherever it does exist, it had the same origin that it had in England, and in obedience to the same forces of peace and industry That operated against it in that country, . must pass away. . . . The degree of heat or humidity, or the luxuriant vegetation of the tropics had no more to do with this political organization than the degree of cold, or the dryness of the atmosphere, or the comparative poverty of the soil of some of the Western States with the similar political organization of the Indians that roamed over them. None of these physical characteristics can prevent the play of those forces that drive people eventually to the adoption of that form of social organism that will best promote their happiness. As the social philosophy of evolution shows, the social organization best fitted for this purpose is the one where the largest

individual freedom prevails." Finally, the writer argues, the contention that the white man cannot live and work permanently in the tropics, on which Mr. Kidd's demonstration boring plant on Lanal, sent the news practically rests, has slender basis in fact. He says;

"Alfred Russel Wallace, who spent twelve years in the tropics, says in a and does work in every part of them. in gurope or the United States - namely, because he does not have to. When however, necessity lays its brave hands on him, driving him to earn whole one. In the "small hours," when writhing in scale indigestion, he said to his physician, "factor, save my life it possible! I am not afraid to die, but I am ashamed to!"

his living by the sweat of his brow, his physician, "factor, save my life season 15,500 tons of sugar. The rest as well as he does in the imperate of the crop is estimated at 5000 to 7000. That is shown particularly in Queenshis living by the aweat of his brow, Ewa has manufactured so far this he does it in the tropical region quite There is no true life without nelf, tons and more, just according to who land. WIRELESS STATION AT SOUTH FORELAND LIGHT. The illustration presents a view of the British terminal of the Marconi wireless telegraph experiment. On the top of the flagpole is a sensitive receiver which can detect the vibrations generated miles away. It is called a coherer, because the cohesion of metals is the chief principle upon which it acts. It is o sensitive that it catches the Hertz wave signals even when it is incased in a protecting metal box.

ted with slight compunction, and defended on the same ground that it was defended in the South and elsew here.

The time must come when free institutions will be found as essential under the equator as farther north. Without them social evolution cannot reach its highest point, nor man attain to his greatest happiness, a state that despotism and the pacific origin of he is always seeking, no matter where he lives."

An Estimable Woman Dead. (From Saturday's Advertiser.)

Mrs. F. Wilhelm, wife of the wellknown contractor, architect and builder, died at 6:50 o'clock last evening at the family home on Keeaumoku street. Mrs. Wilhelm had been ailing for some time. She was forty-four years of age, and leaves one daughter. Mrs. Wilhelm was a Hawaiian lady of the rarest qualities, and her acquaintance was held in the nighest value by all who had the privilege of knowing her. Mrs. Wilhelm was ever thoughtful of the welfare and comfort of others, and ever ready and willing to assist all whom she believed might be in distress. The bereaved husband and daughter have the most carnest sympathy of their wide circle of

Watch for Mr. Babbitt.

Pupils and friends of Professor W. H. Babbitt, who is about to retire from the faculty of Oahu College, yesterday presented the popular young instructor, athlete and society man with a beautiful gold hunting-case watch and guard. The inscription is the college, yell: Oahu-oa, Oahu-oa, Punahou, Punahou, mau-a-mau!. Professor Babbitt is, quite naturally, much pleased with the token of friend ship and regard. He, as has been stated, leaves the college to business life in the city.

deavoring to improve its play. Lieut, Hancock, who was recently elected fail to see them. manager, is proving himself the right man for the place. He is thoroughly popular with all the players and they are doing well under his direction. The men who made the poor showing last Saturday have been dropped, and bet- with plush lined drawers for ter players put in their places. It is intended if possible to make the team one composed solely of members of Battery I. This is done because when a portion of the team is from the soldiers stationed at the barracks at the park, and the remainder from those stationed in town the proper practice cannot be obtained. Even when they do practice, one part in town the others at the park, when they combine and appear on the field the team work. which is so essential, is entirely lacking. It is next to impossible for the men to get off at the same time and practice together. For this reason it is advisable for the entire team to be selected from one place or another. The only question is whether the betaggregation can be chosen from Battery I, or from the other three batteries at the park. The opportunity has been given the former. It remains to be seen whether or not they can play fast enough ball to travel in the leagu

Alumni Club House.

There was to have been a meeting of the trustees of the Bishop estate yesterday afternoon to finally settle upon the building of the clubhouse for the Kamehameha Alumni. On account of a quorum not being present action was postponed until next Friday. Everything is in shape for the final steps to be taken. The building will be a large, up-to-date affair. It will be situated on the property back of the High School. The cost of building Liliuokalani was brought by the Mio- will be borne entirely by the estate, wera yesterday. The report states and a low rental will be charged the

Mrs. Dole is requested by the ladies sailing. No word of any kind was re-Chinese and Japanese. The meeting is ceived by anyone in this city. It is called for Friday, June 16th, at 9:30 thought the report is unfounded or else a. m. at the Y. M. C. A. hall. It is some one would have received definite hoped that all ladies interested will make an effort to attend.

TALK FOR MONEY lars and not feel it!" Make it ten the thousand and feel it. That only is THE WHITE MAN true giving which one feels.

Rev. J. A. Cruzan's Appeal for Mission Funds.

Real Giving-Sacrifice Must be involved-Several Anecdotes-A Test Case Recounted.

(From the sermon of Rev. J. A. Cru-zan at the Home Mission rally, Cen-tral Union church, June 4, 1899.)

The conversion of the world, of Hawaii, is not a question of men, but of over some of the extensive fields. money. The consecrated men and wowomen have the money to send them. utive mansion on Emma street. America is the richest nation in the world; English-speaking Hawaii is the richest part of that richest nation. ing people at a dinner given by Mr. Not long since a keenly observant English visitor told us, in the chastely hou home of the hosts. severe dialect of his native island that "Americans are too beastly prosperous!" We understood him without difficulty. We knew that he told the truth. And that is also true of English-speaking Hawaii. We have no lack of money. What we lack is the Gen. Greely Buys a Trio consecration of our money.

We owe this to God. We are not our own. All that we have and own belong to Him. And this is as true of the poor man's dollar as it is of the rich man's millions. We should change the form of our question. We ask, "How much ought I to give to the Lord's work?" We ought to ask, "How much of my Lord's money ought I to use for myself?" Such a change of questions would change the lives of some Christians, as for example, that churchman of whom Bishop Potter tells who gives \$5 per year to missions and \$800 a season for an opera box. It would change as radically the lives of some men, who give nickels with an air that

"When we asunder part it gives us inward pain, we shall still be joined in heart and hope to meet again.'

We owe this consecration of our money to our fellow men. With sublime confidence Jesus committed the redemption of the race to his church. It is an awful responsibility. It has not been met as it ought. Sixty gencrations, a vast host of at least thirty billions unevangelized heathen have gone to the judgment seat of Christ since he gave that commission to His

We are not responsible for the past, but we are responsible for the present. We are responsible for the evangelization of the remnant of the Hawaiian race, for the thousands of laborers on our plantations, out of whose toil we are making immense fortunes. How are we going to answer to Almighty God for these heathen men and wo men? What shall we do, in the day of account, with the silver, and the gold, that we have withheld from the Lord's

We owe the consecration of our day is in danger of perishing in luxury and worldliness. The reason why so many Christians have only a name to live is that they are sponges fastened to the rock of materialism, taking in but never giving out. In all life using is essential to gaining. It is a universigned for Manchester canal segvice, sal law that we get only by giving.
"He that loseth his life shall find it." The law of self-preservation demands that you think, plan, give, live for others. You dwarf your life just to the cargo steamer built for the Manchester degree that you limit your sympathy line running to Canada. The Manto yourself, your family, your com-munity. Mr. Lydgate tells us that some Kauai Christians will give only for work on that island. That type of Christian is not confined to Kauai. He water-tight compartments, all extendlives on Maul, Hawaii, even in Hilo. He is like the wealthy man who never gave for anything, who astonished his neighbors by making a liberal dona-tion for a town clock. When asked the The engines are inverted triple-expanreason, he said: "I give my money only sion, with 30, 50 and 82½ inch cylin-where I can hear it tick!" Such a nar-ders and 54-inch stroke. She can carry row, selfish outlook brings spiritual stagnation, atrophy, paralysis, death. The love and self-sacrifice you put in-to any good cause comes back to you ready to launch. in moral strength, growth, grace and beauty.

It is written of Jesus that "For the joy that was set before Him He went to Calvary." The joy of self-sacrifice! There is none other so sweet. A few find it in giving. More than fifty years ago Nathaniel Cobb, in his Boston counting room, wrote this cove-nant: "By the grace of God I will the grace of God I will give one-fourth of the net profits of my busi-ness to charitable and religious uses. If I am ever worth \$20,000 I will give one-half my profits; if I am ever worth \$30,000 I will give three-fourths, and the whole after \$50,000. So help me God! or give to a more faithful steward and set me aside!" God tested and tried him, but Nathaniel Cobb stood the test. He died worth a little less than \$50,000. On his death-bed he said: "How good God has been to me! I have had the joy of giving away ter; not the slightest sign of brackish-more than \$200,000." I cannot under-ness about it. After a severe test with stand how a Christian man can die worth a million dollars. I should think he would feet like old Dr. Em. opinion that it would supply 5,000,000 He was passionately fond of gallons per twenty-four hours. mince pie. One night he ate nearly a whole one. of Electric Automobiles.

Two Heavy and One Light-For Im mediate and Varied Use in the Field -Duplicate Batteries.

WASHINGTON .- Gen. Greely, Chief of the United States Signal Service, has awarded a contract for three electric automobile telegraph and balloon wagons to be used by the Signal Corps. Each automobile will cost about \$1800 and \$1500 added for extra batteries.

The specifications of the contract provide that two shall be suitable for heavy work and one for light work. It is proposed to use them in conjunction with balloon work and experiments to be conducted in the Marconi system of wireless telegraphy. The heavy automobiles are to carry not less than 800 pounds, not including the driver, and to be charged with electricity to run not less than twelve miles without recharging. It is proposed to use the heavy wagons for general delivery or emergency work. They are to be so arranged that at any time they can be reconverted into Signal Corps stations, with telegraph lines running to military headquarters, or when not needed for this work to carry batteries for general service in the field.

The light wagon will be built to carry not less than four persons, nad will be fitted with a switchboard, the same as others. Its minimum radius of action without recharging will also be twelve miles. Each vehicle is to potism, and pacific activities always to be supplied with duplicate batteries, money to ourselves. IN THE TROPICS.

The thesis of Benjamin Kidd, in bit recent book on "The Control of the Tropies," that the white races cannot live and form self-governing communities in hot climates, is regarded by the editor of Appleton's Popular Science Monthly as equivalent to the proposition that freedom is limited by climate, and against this he protests ested in watching the reduction of as an assertion directly contrary to all cane to the sparkling crystals turned the generalizations of modern social from the Ewa centrifugals. On leav- science, Mr. Kidd, it will be remem bered, points out that, although the white man cannot live permanently in the tropics, he must control them; and hence he gives aid and comfort to the American expansionist. Of this view the writer of the editorial says:

"Whether Mr. Kidd recognizes the odious significance of his captivating speculation or not, it is certainly a plea and an apology for slavery and political despotism in the tropics. . There is reason to believe that it must be relegated to the limbo of a kindred and popular superstition. Within the past year much has been said about the genius of the Anglo-Saxon for freedom and the ethnic incapacity of the Latins for that boon of civilization. Even so great a scholar as Guizot encourages this extraordinary theory.

. . In apology for his misinterpretation of social phenomena there can be urged his ignorance of the law of evolution and of the hardly less important law of the militant origin of despotism and the pacific origin of freedom. No such apology can, however, be made in behalf of Mr. Kidd, or of any other apostle of imperialism. Not only have they at command all the generalizations of social science, but all the facts upon which those generalizations are based, to prove that neither climate nor race is a limitation upon freedom.

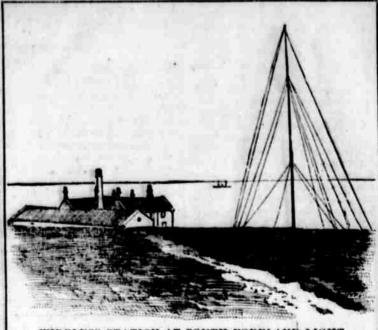

"If climate determined the character of the political institutions of a people, many questions would be suggested at once that would be beyond solution. Why, for instance, should a certain freedom have existed in Athens, and the most intolerable despotism in Sparta? Again, why should there be despotism in Russia and Germany, as well as in Morocco and Egypt? Another series of questions equally perplexing can be raised. Why should there be more freedom in England today than six hundred or even one hundred years ago? The climate has not changed in the interval. Why should the institutions of Spain in the thirteenth century have been more liberal than in the seventeenth? Why was It many before the Thirty Years' War had virtually ceased to exist at the Peace of Westphalia? Here, also, the climate had not changed. . . . The only satisfactory answer to these questions is to be found in the fact that

militant activities always lead to desfreedom. When people get into war, the central power must exercise all the authority over life and property essential to success in battle. . .

"Whether despotism exists, as Mr. Kidd and his followers assume, among all the indigenous populations of the tropics, only a careful investigation of the subject would permit one to say. But that it must, as they contend, always exist there, none of the laws of social evolution give the slightest warthe same origin that it had in England, and in obedience to the same forces of peace and industry That operated against it in that country, . must pass away. . . . The degree of heat or humidity, or the luxuriant vegetation of the tropics had no more to do with this political organization than the degree of cold, or the dryness of the atmosphere, or the comparative poverty of the soil of some of the Western States with the similar political organization of the Indians that roamed over them. None of these physical characteristics can prevent the play of those forces that drive people eventually to the adoption of that form of social organism that will best promote their happiness. As the social philosophy of evolution shows, the social organization best fitted for this purpose is the one where the largest individual freedom prevails."

Finally, the writer argues, the contention that the white man cannot live and work permanently in the tropics. on which Mr. Kidd's demonstration fact. He says:

"Alfred Russel Wallace, who spen twelve years in the tropics, says in a recent article that the white man can and does work in every part of them. If he does not work, it is simply for the same reason that he does not work in Europe or the United States namely, because he does not have to. When, however, , necessity lays its heavy hands on him, driving him to earn his living by the sweat of his brow, Ewa has manufactured so far this he does it in the tropical region quite There is no true life without self- tons and more, just according to who land. But when natives can be resacrifice. "I can give a thousand doi- gives the figures. duced to slavery the crime is commitduced to slavery the crime is commit-

PROFESSIONAL COMFORTERS.

A London journal says:

"Today, even the emotions have value in the money market. There are, in London, professional sympathizers, who soothe and comfort the bereaved in return for pelf, performing the service for which they are engrapped in so tactful a way that they soon become indispensable to their employers."

One who kept a hotel in San Francisco during the time when thousands of men made profits in washing out golu dust from the Sacramento sands, said that he kept several "professional companions" as attaches of his hotel, whose duty it was to entertain visiting miners. Many of the miners who visited San Francisco were strangers, and although they had an abundance of gold dust, could not enjoy themselves because they were in fear of heing robbed, or were suspicious of those who offered them acquaintance and social assistance. To such miners a duly authenticated person, genial and intelligent, became a safeguard and friend. He was more than a courier. He became a companion for the time being, and received a salary from the hotel keeper. When the miner had finished his visit, he generally compensated his official friend, and recommended him to others.

As the advance of civilization rapidly divides occupations, the "professional comforter" becomes a social necessity.

The average man or woman is much more interested in his or her own personal affairs than in other people's affairs, and takes much comfort in "unloading" his or her sorrows and tribulations upon some friend or acquaintance. This practice of "unloading," which is usually unnecessary and higher civilization will be partially removed by the engagement of the "professional comforter," who will calmly, and with smiling interest, and for reasonable compensation, take the oppressive load of other's joys and sorrows. A person, disappointed in business, or in the pursuit of marriage, one who has been slighted in social matters, or has any grievance, should be able to command the services of the "comforter" at a stated hour, just as the services of a mayer or dentist or doctor are commanded. Even those who are married, instead of loading each other up with mutual complaints. and reducing the pleasures of home life, should resort to these sympathizing professionals, and obtain from them agreeable and "patent medicine" balms for wounded feelings.

If fortune tellers, and palmists, and ich individual is more occupied, and temperaments become irritable. Even an institution in the nature of those who are sore with grievances may resort, and for a reasonable fee, command the services of a corps of eased." £1272

The Board of Education should seriously consider the matter of educating such a desirable class.

PERPETUAL PLANTS.

One of the new industries lately deof living plants so that they become "perpetual." The market for them is large, for they are now shipped in plants which are "perpetuated" are tion is still a partial secret. The a solution is applied to the roots, which rots them quickly. They are then shipped to the factory in Germaperfumery is also used in keeping up the Islands as a whole are worthy the every cierk, every professional man, petuated plants now used largely in dated them into one strong central the decoration of hotels, theaters and government.

ballrooms, but they are coming into general use in private residences. They are not affected by conditions which injure the live plants and flowers. The temperature does not hurt them, nor do they require watering. In climates waere the cold weather quickly destroys delicate plants and flowers, the cost of decorating with them is large, and calls for experience and skill. The majority of people cannot afford to keep greenhouses, or to warm the rooms of their houses so as to keep an even temperature. The use of the real, but "perpetuated," article enables even the poorest to rival the

richest in decorations. The business in these plants has already become extensive in America. and will increase enormously. Although the method of preparation is a partial secret, it will not remain so for any length of time. As the process is a chemical one, there are scores of skilled and inventive chemists who will experiment in searching for the correct process, and some of them will discover it.

This method of preserving live plants and flowers will work a revolution in the decorations of homes. It will also create a large demand for tropical plants and flowers, and give employment to many persons who own small parcels of land. This discovery is only another illustration of the user of sound knowledge and of the value of scientific inquiry.

KAMEHAMEHA THE FIRST.

June 11th is marked as the birth an

niversary of the Great Kamehameha

the first ruler of these Islands, and

the architect of his own empire. Upon

him has been bestowed the title of "The Napoleon of the Pacific," but in the light of the whole aspect of his career it can be said that he is, within his sphere, a more striking historical personage than the Little Corporal Kamehameha, with less selfishness in his motive, accomplished to the full his broad and cherished plans, where as the Corsican could stamp over all of it only: Effort, but Failure. The name of Kamehamcha is indissolubly associated with the magnificent report of Kingly success. It would be well most disagreeable, destroys much of to make a more thorough presentation the enjoyments of social life, and in a of the life and services of this remarkable man who struck a nation into being. His was a character that will endure analysis. Such a career, realized as it should be known, is an inspiration and a treasure. Kamehameha was first a petty chief in Hawall. He became a leader in the district of Kohala. He became King of the Island. By conduct of a series of brilliant campaigns he achieved authority over the group. He was able to maintain his high position. Bold and finished general that he was, perhaps his greatest strength was shown in administration of his government The genius-talent for work-of this Hawaiian was many sided. He lived simply and worked with his own hands. He encouraged industry while exemplifying it. The magnetism which attracted men to him was his fair frankness. His policy was clairvoyants are important aids in so- proclaimed everywhere. He trustcial regeneration, a higher class of ed his lieutenants. He confided professional is necessary as the affairs in his people. His positiveness of life become complicated, the time that his plans were for the best good was shared by all who tact with the spell of his magic clearness of thought and earnestness of a hospital may be necessary, to which purpose. He was always active, constantly aggressive. It was but natural that he should reap the rich haryest of tremendous toil. All this is professional comforters, well versed in the lesson that well-directed energy the art of "ministering to a mind dis. and that perseverance which is ever found where slothfulness has been banished, is able to fashion out the A FLOURISHING INDUSTRY EXDS. greatest works. THE IRISH ARE HAPPY

Pifteen years ago the British Parisment passed the laws which our life and energy into Ireland, ... The change in the condition of the Irish poor is rapid in comparison with the former state of stagnation. Over 11. 900 cottages have been built and oc cupled by laborers. The mud hoyel has given way to the three-roomed trim cottage. To the children of the laborers it is a fairy's palace. The half acre of land held in fee simple is the acquisition of a fortune. Capital and vested rights bitterly fought these improvements from the beginning. I yielded at first to the farmer peasant but refused to aid the fishermen, and the weavers. Laws were passed which secured for these persons the right to have homes. The land hunger of the large farmers and absentees made them fiercely fight against the taking of these lands, however small the parcels were or large the compensation was. A very small percentage of the agricultural laborers have yet had benefits of the new laws. But during the last fifteen years, the authorities have been feeling their way, friction has been avoided, new laws have been passed, defective laws amended, and more than all, a feeling of contentment has spread over the island

The United States have indirectly aused this great change. It has called over the Irish immigrant until there was danger of the depopulation of Ireland. The Tories fought stoutly every movement made by the Liberals for the benefit of the Irish, and then, as usual, when the Tory statesmen came into power they did for the Irish what they had refused to aid in doin; when the Liberals were in power,

An economic law has done more for Ireland than all the Christian philanthropy of Great Britain. For a hundred years since Emmet was boing for treason, the Irish appealed for justice in vain. The Church Missionary Soclety sent its agents to the listant heathen, but it could not fix its eye upon the hideousness of the dabasement of the Irish, and their sufferings While it cost \$5000 to secure one convert to Christianity in Palestine, and it cost \$1000 apiece to secure converts in Arabia, thousands of Irish children emaclated with hunger, lived in hovels and died of disease. So callous and indifferent had been the English people to the condition of a people separated fom them only by a channel. heir sufferings and degradation were unknown until a few pallanthropists placed before their eyes the thrilling pictures of distress due simply to had laws. America opened her gates to the Irish, and when the British economists saw the final 'eplecion of the land was inevitable, they gave a warning to the politicians, and the reform

The most revolutionary change ! the local government ims been made during the present year. Three months ago the thirty-two counties of Ireland were governed by a close cor poration of landlords, Unionists and Protestants. Today they, or ninetenths of them, are governed by a popular body of tenants and peasants and peasant proprietors, Nationalists and Catholics."

The revolution has been a silent one. The British nation could ten derly care for its East India coolie laborers, but it looked on for a century at the sufferings of the poor on the other side of the Irish Channel, and never moved its hand in aid until the prairies of Western America touched the national pocket.

HALF A BOZEN

Questions to be Discussed By Ladies on Friday.

Scheme for a Cooking School-Chinese and Japanese-The Grade Certificater .

The ladies of Honolulu are requested to attend a meeting at the Y. M. C. A. Hall on Friday morning, the 18th inst., at half-past nine.

First-To discuss the advisability or feasibility of forming a society or league of the housekeepers of Hopolulu, for the purpose of raising fands to establish a cooking school, and employ a competent, professional cook for the training of Chinese and Japanese.

Second-Such Chinese and Japanese to pay a certain fee for the privilege of receiving instruction at said school

Third-Said cooking school to issue certificates to servants after they have gone through a certain period of training.

Fourth-Such certificates to be of different grades, for instance, first econd and third, according to competence, and rates of wages to be regulated by the grade of certificate held by servant.

Fifth-All housekeepers, or those belonging to the society, to unite in refusing to employ cooks who do not carry certificates from said cookies school.

Sixth-Cooks who have been in the employ of persons for a number of years, and are satisfactory and competent, to be granted certificates upon examination by professional cook, employed by the Honolulu School of Cookery.

The above is only a synopsis of the views of a few ladies who hope to interest others in the good work.

AFFABLE WILLIAM.

The German Ruler Chats With Lient Beehler, U. S. N.

BERLIN.-Lieutenant - Commander W. H. Beehler, United States naval attache at Rome and Vienna, was presented to Emperor William at Potsdam recently. He was cordially weicomed by His Majesty, who highly complimented the American navy, and instanced the voyage of the Oregon from the Pacific to the West Indies. and the battle of Santiago as examples of its effectiveness. His Majesty displayed marvelous information regarding the ships and details of the events at Santiago, and asked: "Where is Fighting Bob'?"

Lieutenant-Commander Beehler been invited to dine at the palace next Tuesday, Admiral Tirpitz and the other German naval officials are most cordial toward him.

ANDREE'S BALLOON.

The best opinion now seems to Le that Andree's balloon alighted somethat his fate will soon be determined There seems to be no doubt that about two months after he set out ou his aerial voyage 1 balloon was seen by the inhabitants of a village in Siberia. It was, of course, impossible that the original balloon could have kept affoat for such a length of time. and the explantion given is that Audree had constructed a fire balloon as a signal, which seems to be borne out by the fact that the object seen by the villagers was visible only for about fitteen minutes. It is thought that the condensed provisions carried by the party, with what game they may have taken, would be sufficient to kees them alive until the present, if no accidents befell them.

ILLUMINATING SHELLS.

Illuminating shells for lighting up least a thousand women, representing large areas of ocean in life-saving every State in the Union and many of work, or to obtain the range of the vessels of an enemy are now proposed. The shell used is a hollow cylinder made of steel tubing, and charged with calcium carbide, which, coming intocontact with water, generates acetylene gas. The end of the shell remains above water, and at this end are burnthat morning returned the calls of the ers lighted by an electric device conmany friends they made here during tained in the shell. PROFESSIONAL COMFORTERS.

A London journal says:

"Today, even the emotions have a value in the money market. There are, in London, professional sympathizers, who soothe and comfort the bereaved in return for pelf, performing the service for which they are ensoon become indispensable to their employers."

One who kept a hotel in San Francisco during the time when thousands of men made profits in washing out gold dust from the Sacramento sands. said that he kept several "professional companions" as attaches of his hotel. whose duty it was to entertain visiting miners. Many of the miners who visited San Francisco were strangers, and although they had an abundance of gold dust, could not enjoy themselves because they were in fear of bethose who offered them acquaintance and social assistance. To such miners a duly authenticated person, genial and intelligent, became a safeguard and friend. He was more than a courler. He became a companion for the time being, and received a salary from the hotel keeper. When the miner had finished his visit, he generally compensated his official friend, and recommended him to others.

As the advance of civilization rapidly divides occupations, the "professional comforter" becomes a social necessity.

The average man or woman is much more interested in his or her own personal affairs than in other people's affairs, and takes much comfort in "unloading" his or her sorrows and tribulations upon some friend or acquaintance. This practice of "unloading," which is usually unnecessary and most disagreeable, destroys much of the enjoyments of social life, and in a higher civilization will be partially removed by the engagement of the "professional comforter," who will calmly, and with smiling interest, and for reasonable compensation, take the oppressive load of other's joys and sorrows. A person, disappointed in business, or in the pursuit of marriage, one who has been slighted in social matters, or has any grievance, should be able to command the services of the "comforter" at a stated hour, just as the services of a lawyer or dentist or doctor are commanded. Even those who are married, instead of loading each other up with mutual complaints. and reducing the pleasures of home life, should resort to these sympathizing professionals, and obtain from them agreeable and "patent medicine" halms for wounded feelings.

Artificial the day and show to the world that perfumery is also used in keeping up the Islands as a whole are worthy the the illusion. Not only are these per- best that was in the man who consolipetuated plants now used largely in dated them into one strong central the decoration of hotels, theaters and government.

ballrooms, but they are coming into general use in private residences. They are not affected by conditions which injure the live plants and flowers. The temperature does not hurt them, nor do they require watering. In climates waere the cold weather quickly destroys delicate plants and flowers, the cost of decorating with them is large, and calls for experience and skill. The majority of people cannot afford to keep greenhouses, or to warm the rooms of their houses so as to keep an even temperature. The use of the real, but "perpetuated," article enables even the poorest to rival the richest in decorations.

The business in these plants has already become extensive in America, and will increase enormously. Although the method of preparation is a gaged in so tactful a way that they partial secret, it will not remain so for any length of time. As the process is a chemical one, there are scores of skilled and inventive chemists who will experiment in searching for the correct process, and some of them will discover it.

This method of preserving live plants and flowers will work a revolution in the decorations of homes. It will also create a large demand for tropical plants and flowers, and give employment to many persons who own small parcels of land. This discovery is only another illustration of the uses ing robbed, or were suspicious of of sound knowledge and of the value of scientific inquiry.

KAMEHAMEHA THE FIRST.

June 11th is marked as the birth an-

niversary of the Great Kamehameha.

the first ruler of these Islands, and

the architect of his own empire. Upon

him has been bestowed the title of

"The Napoleon of the Pacific," but in

the light of the whole aspect of his career it can be said that he is, within his sphere, a more striking historical personage than the Little Corporal. Kamehameha, with less selfishness in his motive, accomplished to the full his broad and cherished plans, whereas the Corsican could stamp over all of it only: Effort, but Failure. The name of Kamehameha is indissolubly associated with the magnificent report of Kingly success. It would be well to make a more thorough presentation of the life and services of this remarkable man who struck a nation into being. His was a character that will endure analysis. Such a career, realized as it should be known, is an inspiration and a treasure. Kamehameha was first a petty chief in Hawaii. He became a leader in the district of Kohala. He became King of the Island. By conduct of a series of brilliant campaigns he achieved authority over the group. He was able to maintain his high position. Bold and finished general that he was, perhaps his greatest strength was shown in administration of his government. The genius-talent for work-of this Hawaiian was many sided. He lived simply and worked with his own hands. He encouraged industry while exemplifying it. The magnetism which attracted men to him was his fair frankness. His policy was stantly aggressive. It was but natufound where slothfulness has been banished, is able to fashion out the A FLOURISHING INDUSTRY ENDS. greatest works. It is written that in his carly life Kamehameha was cruel, and almost savage, but he learned soon that kindly firmness was real strength. He was generous, consid-

THE IRISH ARE HAPPY.

Pifteen years ago the British Parliament passed the laws which out ife and energy into Ireland. The change in the condition of the Irish poor is rapid in comparison with the former state of stagnation. Over 11,-900 cottages have been built and occupied by laborers. The mud hovel has given way to the three-roomed trim cottage. To the children of the inborers it is a fairy's palace. The half acre of land held in fee simple is the acquisition of a fortune. Capital and vested rights bitterly fought these improvements from the beginning. It yielded at first to the farmer peasant, but refused to aid the fishermen, and the weavers. Laws were passed which secured for these persons the right to have homes. The land hunger of the large farmers and absentees made them fiercely fight against the taking of these lands, however small the parcels were or large the compensation was. A very small percentage of the agricultural laborers have yet had benefits of the new laws. But during the last fifteen years, the authorities have been feeling their way, friction has been avoided, new laws have been passed, defective laws amended, and more than all, a feeling of contentment has spread over the island. The United States have indirectly

caused this great change. It has called over the Irish immigrant until there was danger of the depopulation of Ireland. The Tories fought stoutly every movement made by the Liberals for the benefit of the Irish, and then, as usual, when the Tory statesmen came into power they did for the Irish what they had refused to aid in doing when the Liberals were in power,

An economic law has done more for Ireland than all the Christian philanthropy of Great Britain. For a hundred years since Emmet was bung for treason, the Irish appealed for justice in vain. The Church Missionary Society sent its agents to the distant heathen, but it could not fix its eye upon the hideousness of the debasement of the Irish, and their sofferings. While it cost \$5000 to secure one convert to Christianity in Palestine, and it cost \$1000 apiece to secure converts in Arabia, thousands of Irish children, emaciated with hunger, lived in hovels and died of disease. So callous and indifferent had been the English people to the condition of a people separated fom them only by a channel, their sufferings and degradation were unknown until a few pallanthropists placed before their eyes the thrilling pictures of distress due simply to bad laws. America opened her gates to the Irish, and when the British economists saw the final depletion of the land was inevitable, they gave a warning to the politicians, and the reform began.

The most revolutionary change in the local government has been made during the present year. Three months ago the thirty-two counties of Ireland were governed by a close corporation of landlords, Unionists and Protestants. Today they, or ninetenths of them, are governed by a popular body of tenants and peasants and peasant proprietors, Nationalists and Catholies."

The revolution has been a silent one. The British nation could tenderly care for its East India coolie laborers, but it looked on for a century at the sufferings of the poor on the other side of the Irish Channel, and never moved its hand in aid until the prairies of Western America touched the national pocket.

While the great Church Missionary Society is supporting missionaries, who tell the millions of people in India that their gods are worthless, and their religions are utterly wicked, the nation itself, in close partnership and alliance with the Established Church, punishes with imprisonment any act of disrespect to these brazen images.

The British nation is, probably, quite right in the attitude it has taken. But those impracticable persons who set up as moral teachers of men. simply one of the rise and decline of and discourse with much learning on the abstract principles of right and cordial toward him. wrong, have the most serious difficulty in giving any really adequate explanalectually and morally than if they had tion of this extraordinary phenome-

> Fortunately in Hawaii, nearly all of the surviving idols have been gathered into the Bishop Museum, where the BRITISH High Priest Brigham feeds, cares for and communes with them, but does not permit them to leave the premises and worry the Government into recognizing them as a social and religious force, or to demand that a temple be built for them on some lot adjoining the Central Union premises in Beretania street.

The 'rights of idols" both here and in India are worthy of the most careful examination by the Social Science Society.

A CONVENT'S CENTENNIAL.

Gibbons, the papal delegate, Mgr. Mar- cidents befell them. tinelli and other prominent Catholic churchmen took part today in the second day's celebration of the centennial of the Georgetown Convent. At least a thousand women, representing every State in the Union and many of the Latin-American countries, took part in the ceremonies.

Russian cruiser Razboynik Saturday afternoon. Captain wich and the officers of the Razboynik that morning returned the calls of the many friends they made here during their brief stay since the arrival of the ship from Valparaiso, May 29.

The Tillie E. Starbuck now on her way from Hilo to New York with a big cargo of sugar is so well-known in this port that it will be of interest to her many friends to remember that she was the first metal ship built in the United States and one of the very first in the world. The Starbuck went into commission June 12, 1883, and she is today trading around the world, one of the most picturesque and profitable vessels of her class in expublic administrations of King Solo- Francisco and from San Francisco to istence, sailing from New York to San mon and the British Queen have been Hawaii as readily as though steam had every carpenter and many of the do-mestic servants owned shares in these tives. Questions to be Discussed By Ladies on Friday.

Scheme for a Cooking School-Chinese and Japanese-The Grade Certificates .

The ladies of Honolulu are requested to attend a meeting at the Y. M. C. A. Hall on Friday morning, the 16th inst., at half-past nine.

First-To discuss the advisability or feasibility of forming a society or league of the housekeepers of Honolulu, for the purpose of raising funds to establish a cooking school, and employ a competent, professional cook for the training of Chinese and Japa-

Second-Such Chinese and Japanese to pay a certain fee for the privilego of receiving instruction at said school.

Third-Said cooking school to issue certificates to servants after they bave gone through a certain period of training.

Fourth-Such certificates to be of different grades, for instance, first, second and third, according to competence, and rates of wages to be regulated by the grade of certificate held

Fifth-All housekeepers, or those belonging to the society, to unite in refusing to employ cooks who do not carry certificates from said cooking school.

Sixth-Cooks who have been in the employ of persons for a number of years, and are satisfactory and competent, to be granted certificates upon examination by professional cook, employed by the Honolulu School of Cookery.

The above is only a synopsis of the views of a few ladies who hope to interest others in the good work.

AFFABLE WILLIAM.

The German Ruler Chats With Lieut. Beehler, U. S. N.

BERLIN.-Lieutenant - Commander W. H. Beehler, United States naval attache at Rome and Vienna, was presented to Emperor William at Potsdam recently. He was cordially welcomed by His Majesty, who highly complimented the American navy, and instanced the voyage of the Oregon from the Pacific to the West Indies. and the battle of Santiago as examples of its effectiveness. His Majesty displayed marvelous information regarding the ships and details of the events at Santiago, and asked: "Where is 'Fighting Bob'?"

Lieutenant-Commander Beehler has been invited to dine at the palace next Tuesday. Admiral Tirpitz and the other German naval officials are most

ANDREE'S BALLOON.

The best opinion now seems to be that Andree's balloon alighted somewhere in Northeastern Siberia, and that his fate will soon be determined. There seems to be no doubt that about two months after he set out on his aerial voyage a balloon was seen by the inhabitants of a village in Siberia. It was, of course, impossible that the original balloon could have kept affoat for such a length of time. and the explantion given is that Andree had constructed a fire balloon as a signal, which seems to be borne out by the fact that the object seen by the villagers was visible only for about fifteen minutes. It is thought that the condensed provisions carried by the party, with what game they may have taken, would be sufficient to keep-WASHINGTON, May 30.-Cardinal them alive until the present, if no ac-

ILLUMINATING SHELLS.

Illuminating shells for lighting uplarge areas of ocean in life-saving work, or to obtain the range of the vessels of an enemy are now proposed. The shell used is a hollow cylinder made of steel tubing, and charged with calcium carbide, which, coming intocontact with water, generates acetylene gas. The end of the shell remains above water, and at this end are burners lighted by an electric device contained in the shell. It is claimed that the light produced is of 1000 candle power and cannot be extinguished by water. The shell is to be shot from a gun to a distance of two miles, and floats with one-quarter of its length above water.

RUSSIA'S MISFORTUNES.

ODESSA, May 30.- The winter wheat crop of Southern Russia has been completely destroyed by a protracted drought. The spring wheat erop is also in jeopardy from the same

cause. The steamer Moscow has sailed with 2500 Cossack immigrants for Port Ar-

"PHILLIE" SAILS.

Big White Cruiser and Admiral Off for Home.

(From Monday's Advertiser.)

The United States cruiser Philadelphia weighed anchor in naval row at 7 o'clock on Sunday morning, and two hours later the smoke of that familiar man-o'-war had disappeared around Diamond Head. All day Saturday the Philadelphia was cleaning up after the coaling, which has begrimed her decks for the past week, and upon her departure was as neat and clean above board as any of the fleet. The bottom of the "Phillie," however, is covered with barnacles and sea slime, and no steam will be wasted by Admiral Kautz in trying to make speed to San having broke soon after the start. As Francisco. There she will be put into dry dock immediately for a thorough cleaning. The Philadelphia carried no mail, as the Australia, sailing for San Francisco tomorrow will arrive in Our Boy again broke and trailed the that port probably a day ahead of the

HIGH PROJECTILE VELOCITY.

A velocity of 3000 feet per second was recently recorded in the late tests to Kamalo plantation for \$30,000. at Indian Head of the new 45-caliber six-inch United States naval gun. This is claimed to be the best record made by a gun of this class. The Krupp 15-cm (5.87-inch) and the 16cm (6.3-inch) use projectiles weighing in kindergarten teaching. 88.2 and 110.2 pounds respectively, but the highest muzzle velocity recorded for these is 2635 feet seconds. These guns are 50 calibers long. The Krupp 21-cm (8.24-inch) uses a projectile weighing 238.1 pounds, and is credited 21st, will probably be given in the with a muzzle velocity of 2822 feet secobtained with a Krupp 24-cm (9.45inch) gun, with a projectile weighing 352.7 pounds. The nearest French There seemed little doubt but gun in type is the Schneider-Canet that upon the result of it hung the quick-fire, 5.91-inch caliber, using a race. The flag fell on a perfect start. projectile weighing 88.2 pounds. With lengths of 45, 50 and 60 calibers this chances. Our Boy and Loupe fought it gun shows velocities of 2625, 2756 and out together to the last half. Here 2953 feet seconds respectively. The Loupe again let out a few tinks and 60-caliber length is an experiment, and the 45-caliber is the one to be compared with the American gun. The six-inch Elswick guns of 50-caliber claim a velocity of 2940 feet seccrowds were rampant. All the names onds, but the British naval authorities of the horses were mingled in one loud say that the velocity is not desirable shout. Loupe never faltered and came owing to the great wear on the gun. The American full tests are not made no need of the whip that McManus laid public; but it is claimed that the results were due to a new smokeless powder recently adopted by this Government.

AN APT REPLY.

(Boston Globe.) The story is told by the historian Sharon Turner, of an Italian Prince in the middle ages who journeyed in glitter and pomp to visit a homely and isolated Prince in the north of Germany. As the two Princes stood upon a lofty hill one day, the Italian ventured to ask, as he surveyed the landprisons and almshouses, Prince?

The rude German hesitated a mo ment and then said: "Your Highness, Six good horses faced the flag in the as for prisons, we need none, since

SAD FATALITY Are You

Herbert W. Dickey.

Field Contrivance Went Wrong-Effort to Save Life - Member of a Leading Island Family.

(Special Correspondence.)

MAUL June 2 .- The morning of the 7th a most frightful accident occurred on Hamakuapoko plantation, causing the death of one of the most promising young men of Makawao district, and making sad the hearts of the entire community.

While engaged in arranging a trolley wire which conveyed cane from the Kaluanui fields to Hamaknapoko the anchor post, a piece of tumber measuring six inches by six, which held fast one end of the wire cable pulled up, and with tremendous force struck Herbert W. Dickey full in the face, crushing in the bones of the fore head and nose. After being conveyed to his home at Kaluanui three doctors were summoned, Messrs. McConkey. Weddick and Raymend, who later in the day performed an operation which, however, proved futile. The accident occurred at 11:30 s. m., and death ensued at 9 p. m. the same day.

Herbert W. Dickey was in charge o the Kaluanui section of mamakuapoko plantation, and was the son of Mr. and Mrs. C. H. Dickey, of Makawao, and the brother of Mr. L. A. Dickey. Mr. C. W. Dickey and Mrs. Harry Waterhouse, Jr., of Honolulu, and of Miss Belle Dickey, who is at present at school in Oakland.

Mr. Dickey was educated at Chicago University, and was but 24 years of age. Physically and mentally he was a type of noble manhood, giving every promise of a most brilliant future. The funeral, conducted by Dr. E. G. Beckwith, will take place today at 11

Monday afternoon, the 5th, Makawao teachers held their monthly meet ing in the Makawao schoolhouse. Exercises in arithmetic and geography were among the events on the program.

On the 10th a fair will be held in the Lahaina English Church.

It is stated that Dr. Mouritz has sold his lands at Mapulehu, Molokai.

Paia plantation as well as Hama kuapoko will establish a kindergarten. Miss Steele, who will have charge of the Hamakuapoko school, is at present in Hilo taking a course of lessons

The Maul Board of Registration when stopped by orders fom Honolulu had registered nearly 300 voters.

The closing exercises of Maunaolu Seminary, which will be held on the open air, weather permitting, inasmuch as the rooms in the old Halea- nau and Claudine will sail on Wednesly spacious. The program for this al fresco entertainment includes a drill by the girls and other interesting given by Mrs. Gunn at the opera events.

Weather: Dry. with regular tradwinds.

Two in One Day.

Saturday was a wedding day within the precincts of St. Andrew's Cathedral. In the morning at 11 o'clock, the Rev. Kong Yin Tet, paster of the Chinese Episcopal Church, was united in marriage to Miss Ching Nget Chin, who recently arrived from China. The Bishop of Honolulu performed the ceremony in the presence of a very large Chinese congregation.

In the evening, at 7:30 o'clock, Charles Kaleikau, olery in the Registrar's office was married to Miss Lydia Rose quite a number of friends being present to see the couple made man and wife, the Rev. Alex. Mackintosh officiating. The groom being a member of the surpliced choir of the cathedral, his fellow-members turned out and sang the hymn, "How Welcome Was the Call."

Wray Taylor officiated at the organ and played the usual wedding music.

A SHARP PIECE OF BUSINESS.

Among the latest devices in the ecoomical conduct of business is the scheme alleged to have been hit upon CHINA by several Chicago business concerns to ship large quantities of advertising circulars to Mexico in bulk and have them mailed there. The postage is the same there as here, but owing to the depreciated value of Mexican money there is a considerable saving in the amount of American money actually paid out for stamps. This performance can only be stopped by the postal authorities of the United States and Mexico acting in conjunction, although there appears to be nothing illegal in

Poisoning Yourself?

You might make a single meal of rich pies and cakes, and not mind it. But you could not live on these all the time without ruining

Yet, week after week and month after

Yet, week after week and month after month, you allow your brain and nerves to be fed with impure blood.

The general debility, thin blood, pale checks, nervousness, loss of appetite and depression of spirits, are loud warnings from mature. Your nervous system is weakening. Before the ruin comes take

AYER'S Sarsaparilla

It removes the poisons from the blood, and thus removes the cause of all your trouble. It aids the digestion, strengthens the nerves and supplies the body with rich, red blood.

For constipation take AYER's PILLS. They tromptly and surely cure. Take them with tyer's Engaparilla: one aids the other.

Prince David held the ribbons over Morosco, Prince Cupid over Silver King, Dr. Humphries over Gussie B, and W. Wolters over Flora G. The betting was evenly divided between the first and last named. After the start there was no doubt as to the result. Flora G took the lead and held it throughout. The others broke and strung out, Gussie B trailing the procession. Flora G came home an easy

"PHILLIE" SAILS.

Off for Home.

(From Monday's Advertiser.)

The United States cruiser Philadel phia weighed anchor in naval row at 7 o'clock on Sunday morning, and two hours later the smoke of that familiar man-o'-war had disappeared around Diamond Head. All day Saturday the Philadelphia was cleaning up after the coaling, which has begrimed her decks for the past week, and upon her departure was as neat and clean above board as any of the fleet. The bottom of the "Phillie," however, is covered with barnacles and sea slime, and no steam will be wasted by Admiral Kautz in trying to make speed to San Francisco. There she will be put into dry dock immediately for a thorough cleaning. The Philadelphia carried no mail, as the Australia, sailing for San Francisco tomorrow will arrive in that port probably a day ahead of the white cruiser.

HIGH PROJECTILE VELOCITY.

A velocity of 3000 feet per second was recently recorded in the late tests at Indian Head of the new 45-caliber six-inch United States naval gun. This is claimed to be the best record made by a gun of this class. The Krupp 15-cm (5.87-inch) and the 16cm (6.3-inch) use projectiles weighing 88.2 and 110.2 pounds respectively, but the highest muzzle velocity recorded for these is 2635 feet seconds. These guns are 50 calibers long. The Krupp 21-cm (8.24-inch) uses a projectile with a muzzle velocity of 2822 feet secde and the same obtained with a Krupp 24-cm (9.45inch) gun, with a projectile weighing 352.7 pounds. The nearest French There seemed little doubt but gun in type is the Schneider-Canet lengths of 45, 50 and 60 calibers this and the 45-caliber is the one to be compared with the American gun. onds, but the British naval authorities owing to the great wear on the gun. The American full tests are not made sults were due to a new smokeless powder recently adopted by this Government.

AN APT REPLY. (Boston Globe.)

The story is told by the historian Sharon Turner, of an Italian Prince in Violin-b. m., aged, by Alex. Button the middle ages who journeyed in glitter and pomp to visit a homely and isolated Prince in the north of Germany. As the two Princes stood upon a lofty hill one day, the Italian ventured to ask, as he surveyed the land-"Where are your churches, and almshouses, Prince

SAD FATALITY Are You

Accident of Mr. Herbert W. Dickey.

PROMISING YOUNG MAN

Field Contrivance Went Wrong Effort to Save Life - Member of a Leading Island Family.

(Special Correspondence.)

MAUL June 9 .- The morning of the 7th a most frightful accident occurred on Hamakuapoko plantation, causing the death of one of the most promising young men of Makawao district, and making sad the hearts of the entire community.

While engaged in arranging a trofley wire which conveyed cane from the Kaluanui fields to Hamakuapoko, the anchor post, a piece of lumber measuring six inches by six, which held fast one end of the wire cable, pulled up, and with tremendous force struck Herbert W. Dickey full in the face, crushing in the bones of the forehead and nose. After being conveyed to his home at Kaluanui three doctors were summoned, Messrs. McConkey, Weddick and Raymond, who later in the day performed an operation which, however, proved futile. The accident occurred at 11:30 a. m., and death ensued at 9 p. m. the same day.

Herbert W. Dickey was in charge o the Kaluanui section of mamakuapoke plantation, and was the son of Mr. and Mrs. C. H. Dickey, of Makawao, and the brother of Mr. L. A. Dickey. Mr. C. W. Dickey and Mrs. Harry Waterhouse, Jr., of Honolulu, and of Miss Belle Dickey, who is at present at school in Oakland

Mr. Dickey was educated at Chicago University, and was but 24 years of age. Physically and mentally he was a type of noble manhood, giving every promise of a most brilliant future. The funeral, conducted by Dr. E. G. Beckwith, will take place today at 11

Monday afternoon, the 5th, Makawao teachers held their monthly meeting in the Makawao schoolhouse. Exercises in arithmetic and geography were among the events on the pro-

On the 10th a fair will be held in he Lahaina English Church.

It is stated that Dr. Mouritz has sold his lands at Mapulehu, Molokal, to Kamalo plantation for \$30,000.

Paia plantation as well as Hamakuapoko will establish a kindergarten. Miss Steele, who will have charge of the Hamakuapoko school, is at present in Hilo taking a course of lessons in kindergarten teaching.

The Maul Board of Registration. when stopped by orders fom Honolulu. had registered nearly 300 voters.

The closing exercises of Maunaolu Seminary, which will be held on the weighing 238.1 pounds, and is credited 21st, will probably be given in the open air, weather permitting, inas-falling on Tuesday the steamers Kikala school building are not sufficient ly spacious. The program for this al fresco entertainment includes a drill events.

Weather: Dry, with regular trade winds.

Two in One Day.

Saturday was a wedding day within he precincts of St. Andrew's Cathedral. In the morning at 11 o'clock, the Rev. Kong Yin Tet, pastor of the Chinese Episcopal Church, was united in marriage to Miss Ching Nget Chin, who recently arrived from China. The Bishop of Honolulu performed the ceremony in the presence of a very large Chinese congregation.

In the evening, at 7:30 o'clock, Rose, quite a number of friends being present to see the couple made man and wife, the Rev. Alex. Mackintosh officiating. The groom being a member of the surpliced choir of the cathedral, his fellow-members turned out and sang the hymn. "How Welcome Was the Call."

Wray Taylor officiated at the organ. and played the usual wedding music.

A SHARP PIECE OF BUSINESS.

Among the latest devices in the economical conduct of business is the scheme alleged to have been hit upon by several Chicago business concerns to ship large quantities of advertising circulars to Mexico in bulk and have them mailed there. The postage is the same there as here, but owing to the depreciated value of Mexican money there is a considerable saving in the amount of American money actually paid out for stamps. This performince can only be stopped by the postal authorities of the United States and Mexico acting in conjunction, although there appears to be nothing illegal in

Poisoning Yourself?

You might make a single meal of rich pies and cakes, and not mind it. But you could not live on these all the time without ruining

your digestion.
Yet, week after week and month after month, you allow your brain and nerves to be fed with impure blood.
The general debility, thin blood, pale cheeks, nervousness, loss of appetite and depression of spirits, are loud warnings from nature. Your nervous system is weakening.
Before the ruin comes take

AYER'S Sarsaparilla

It removes the poisons from the blood, and thus removes the cause of all your trouble. It aids the digestion, strengthens the nerves and supplies the body with rich, red blood. For constitution take Aven's Pills. They promptly and surely cure. Take them with Aver's Sursuparilla: one aids the other.

LIVES OF THE OWNERS

"All Kinds of People to Make Up a World."-Characteristics and Careers Outlined.

Picciola: Your nature is not develaned: you are young and inexperienced, and are full of vague longings and applications for the unattained. Are deeply affectionate, but not especially considerate; very hospitable, but not sympathetic. A strong desire to travel is because of a thirst rather for adventure than knowledge. You disposition is honorable, but intenseby selfish. You will not make a good mother, though your children will worship you and be blind to your faults. You will be happily married; much more happily than your hushand. "Take all and give nothing" is the unconscious motto on which your life lines will run.

000 Irish Lassie: Practical, with considerable common sense. Buoyant spirits, amiable disposition, but critical and discriminating. Fond of the apposite sex, but fastidious in the selection of a life partner. You will marry once, and there will be a rosome in your life which you will earefully treasure. You will have two serious illnesses, and for a time will be in a precarious condition of health. Your mission in life will lead you along practical lines of usefulness and selp to your associates,

000 Sarah Ann: Proud, haughty and self-complaisant. Much natural ability, but marred by egotism. Musical, onkivated and entertaining. Fond of athletic amusements. Life line well warked. Not emotional or sentimental. but will fall in love with a man much younger than yourself whom you will not marry. Much travel and wealth are indicated.

000 Schlitz: A jolly, good-natured, energetic boy; will always be a boy, though you live to be ninety. You look on life as a huge joke, and only have the blues on rare occasions. You have numerous adventures, for the slightest incident is fraught with interest to you, and everything is converted into a good story. You marry of an ardent heart attack; in all three eases, however, there is money to add est fault is an elastic conscience.

000 Decisive, alert and remarked talent for either. Your life line is well marked, and you can reasouably expect long life with little sickness and no accidents of serious nature. You forgive, but never forget an injury. You are plous, but not deaply religious. Slight vein of superstition in your nature. A great sorrow is evident, and something of a romance in your life. Fortune will both smile and frown upon you. Will marry twice; the first time more happlly than the second.

000 Coratie. Gentle, confiding and lovable. Affectionate, inconsistent and variable. Fond of ease and comfort. but capable of mental and physical exertion. Good conversationalist, quick at repartee, and with more than ordinary talent for art. Fond of society and a little flirtatious, but will character and steadfast devotion heretofore unsuspected. Life line rather broken with ill health and disaster strongly marked in middle life. Your comfort, lacking only domesticity on your part to render it perfect.

000 Queen Bee: You are subject to fits of depression amounting even to mel ancholia; have a love affair that is ail absorbing. Your past is full of monotony, your present is obscured by for several years, and last fall had a doubt and anxious foreboding. Your more severe cough than ever before, future gives promise of brightness and I have used many remedies without regood. You will have your greatest celving much relief, and being recomprosperity after you are thirty-eight, mended to my a bottle of Chamberlain's trying to hide; through much broad knowing me to be a poor widow, gave ing its importance is magnified; were gratifying results. Much as the officials would like to have a regular man-of-war in Samoun waters besides the unxillary erulser Badger and the collier Braius, it has been found impossible to reach Rear-Admiral Kautz with instructions, and it is expected that he will sail in a couple of days for San Francisco.

LIEUT, GILMORE.

WASHINGTON, May 31.- The following dispatch, received by the Navy Department, the first direct news of Lieut, Gilmore that has been had for over a week, is taken as a hopeful indication of his situation:

"Manila, May 31. Secretary of the Navy, Washington: An escaped Spanish prisoner reports seeing Gilmore and some sailors, all well. Gilmore is allowed a horse. BARKER."

RECREATION HALL.

Catholic Mission Feature at Camp Mckinley.

Under the direction of Father Valentin of the Catholic Mission, a recreation hall has been established at Waikiki for the soldiers. The place the twelve-inch breaking plow is used occupied for the purpose is the building originally erected by the Catholic Church during the stay of the volum teers. It was built for devotional purposes, and is situated but a short distance from the parrache.

Although the new organization i under the direction of the Catholic Fathers, its privileges are open to all. It is intended to provide books, magazines, chess and other games, and writing material for those who desire to attend. On Friday evenings there will be regular choir rehearsals for the services on Sunday. There are to be no charges, but every pay day the soldiers are to contribute whatever they feel like giving. Sergt, Smith of Battery A, has been appointed president of the organization. By establishing such a place it is acced to provide a point where the soldlers can pass the time pleasantly.

BRITISH SOLDIERS.

Several Deserted at Malta to Join the Yankee Organizations.

The proverbial desire of the British soldier to be where there was fighting was well illustrated during the stop of the American transport Sheridan at Malta, where the garrison were dazzled by the Americans' prospect of acthree times; each time as the result tive duty in the Philippines. "The British garrison fraternized heartily with the visitors, with rather unforwest to the chase. You will be success- tunate results in some cases," says the ful is business, and will leave a large Civil and Military Gazette, "for when fortune to your heirs. At the age of the transport was leaving Malta the thirty-three you go around the world. authorities notified the United States and about this time you meet your Commandant that thirteen British solsecond wife. You have remarkable vi- diers from the garrison had deserted tality and resist illness. Your great- and had probably secreted themselves as stowaways on board. One of the delinguents was soon discovered and was sourceful. Kind, gentle, but slightly Port Said; while, shortly before Cohad in the meantime donned the Amerand were handed over to the military authorities at Colombo. The remaining be accounted for."

CIVIL SERVICE CONTRACTED

WASHINGTON, May 29. President to the civil service rules, which he has had under consideration for about a convention." year. It releases from the operations of the civil service rules about 4000 offices. Among such places are the following: Pension examining surgeons Indians employed in the Indian serv ice, not connected with the Indian school service, and many places in the engineer department at large, the quartermaster's department at large. meet your fate and display a depth of the subsistence department at large character and steadfast devotion herethe War Department. With reference to the places in the outside War Department's service, it is provided that they shall be subject to regulations later years will be spent in peace and provided by the Secretary of War and approved by the President, thus placing these branches of the service on the same substantial basis as the Navy Yard service.

the Place Already.

Encouraging Figures - Laborers' Quarters-Ploughing is Easy-First Crop 6,000 Acres.

HILO, June 8.—Hawali Herald; A. Horan, who is in charge of the planting interests in Olaa for the present, came down to Hilo on Tuesday on business connected with the company.

"At present we are planting seed in the cleared fields formerly planted in coffee. We have about 100 acres plantes now, and will increase this to 500 as rapidly as possible. We have 200 acres now ready for the cane. The clearing thus far done is only in a general way, and no great amount of this kind of work will be done until the manager is appointed.

"Carpenters have erected laborers quarters at Mountain View, where 200 can be accommodated, and another house will be built at eleven miles The soil up there is so light that we are plowing fields with six-inch plows and using only a single horse. Where a single span of mules can do the work with ease. Just as fast as the ground can be plowed it will be planted, and it is expected that not less than 6000 acres will be planted for the first crop.

"There are big gangs of Japanese or the plantation clearing the land, and in many places rooting up the coffee trees. Four-mule teams are hauling seed cane from below, and this is being planted as rapidly as possible, and Contractor James is engaged with other carpenters erecting such buildings as are needed at present. A great many acres have been planted in seed cane, and in nine months this will be ready to cut and plant, and eighteen months afterwards it will be ready to eron. This means that in twenty-seven months Olaa will be ready to take off the first crop.

"Nothing can be done regarding the selection of a mill site until a manager is appointed.

"I have not heard of any one selling their paid-up stock at par; in the main the people who hold it do so as an investment and not for speculative purposes."

A Church Statement.

(Anglican Church Chronicle.) The annual report of the Society for the Propagation of the Gospel in Foreign Parts for 1898 has just reached It has become a bulky volume and is filled with interesting accounts of the laborers in the Vineyard in all parts of the world. The following is what the report says about the church in Hawaii: "On August 12, 1898, the Hawaiian Islands were annexed by the United States of America. Among the results of this memorable event will probably be at no distant date the termination of the society's connection meetings are under the management mination of the society's connection with the Islands, which commenced in galaxies in interest. At the last man are CALIFORNIA FEED CO. petulant. Fond of music and art, but lombo was reached, eight others, who 1862. No change will be made in a long the church was crowded, and hurry, or any inconvenience be readily ican uniform, were likewise discovered caused to any person, but as the society has never made grants to the missions of the sister church of the united four deserters, however, have still to States since the consecration of Bishop Seabury, it will not create a new precedent by maintaining the church work in Honolulu. Perhaps-indeced probably-union with the church of the United States may bring about fresh McKinley today issued the amendment extension and development of the church thus acquired by the general

DUKE D'ARCOS.

Spain's New Minister and His Suite Reach New York.

NEW YORK, May 31,-The most notable passenger who arrived on the North German Lloyd steamship Kaiser Wilhelm der Grosse was the Duke d'Arcos, who comes to assume the posof Spanish Minister at Washington which has been vacant since the hur ried departure of Senor Polo y Be. nabe, April 20, 1898, on the eve of the war between the two countries.

The new Minister was accompanied on the voyage by his wife, formerly Miss Virginia Woodbury Lowery, or Washington, and by Senor Juan Ria no, who will act as first secretary of the re-established Spanish Legation. The Duke manifested the utmos

hopefulness in the results of his mis ston and spoke reservedly of the out come of the war. "That is past," he said, "and Spain

coks only to the future." He was anxious for the latest news of the situation in the Philippines, and upon being asked his opinion of the outcome of the campalan there.

MIKADO'S NAVY

(Japan Times.) Of the war ships ordered for con-

struction from different ship-building companies at home and abroad, sixteen second-class torpedo boats are expected to be finished in 1900, and eleven first-class torpedo boats in 1901. Besides these, a first-class armored cruiser, to be christened Iwate, and a first-class battleship which will be named Mikasa, will, it is expected, be completed respectively in 1900 and 1901. The Iwate's displacement will be 9900 tons and the Mikasa's 19,000 tons. Both vessels are expected to develop a speed of 20.43 knots.

A SCHOOL VISIT.

A Model Printing Plant Examined By Pupils.

Charles E. King, teacher of the Waiahole School, brought one of the advanced classes to the city yesterday morning to see the sights.

By prearrangement they were taken through the Hawaiian Gazette Company's establishment, and the printing business explained to them in de tail.

The children were greatly interested in the working of the typesetting machines and the difference between hand and machine composition was shown and explained to them.

On entering the pressroom their attention was concentrated on the large Optimus press, which was turning out some fine half-tone work, of which they secured samples.

They were then taken into the bind ery and shown how books large and small were turned out. Their intelligent questions showed that they obtained a very good idea of what they

Each scholar was given a "slug" from the linotype machine, with name on it, which they will keep as a memento of the trip.

After Many Years.

Mrs. Cyrus T. Mills, of California, is spending a time here as the guest of Mr. and Mrs. S. M. Damon, and is meeting many old and dear friends Mrs. Mills was a resident of Honolulu 1859-61, when Mr. Mills was presiden of Oahu College. The lady is now president of Mills College, one of the best-known educational institutions on the coast, and one patronized extensively by Island people. Mrs. Mills is enjoying to the utmost her visit to the city.

Soldiers Meeting.

Thursday evening the third in the series of weekly entertainments for the soldiers in Camp McKinley was held in the Waikiki Church. These ing the church was crowded and splendid entertainment provided by Mr. Hambly. The "boys" enjoyed the graphophone immensely, judging by the hearty applause.

Rev. Mr. Morgan will also hold sercices in the church every Sunday

PAINE'S MONUMENT.

NEW YORK, May 31.-After sixty years the Thomas Paine monument, in New Rochelle, has been finished by the crowning of the shaft, which was erected in 1839, by a colossal bust of the free thinker. About 300 admirers of the writings of Paine made the trip to the monument yesterday and paricipated in the exercises. It had bee: xpected that Robert G. Ingersol ould speak, but he did not appear he placing of the bust was done uner the auspices of the Liberal Club of lanhattan and the Brooklyn Philoophical Society.

PADEREWSKI MARRIED.

NEW YORK, May 28.- The World's Paris cable says: It is learned here or nimpeachable authority that Ignace aderewski, the planist, was secretly parried last December to Mme. Elena lorski, aged 44, the divorced wife of adislas Gorski, the well-known vio inist, formerly a member of the Lamoureaux orchestra. Mme. Gorski, when n Geneva recently, signed herself "Elena Paderewski" on the register of he Casino there.

Hives are a terrible torment to the little folks, and to some older ones. Donne's Ointment never falls. Instant relief and permanent cure. At any chemist's, 50 cents.

"COON SHOW" AGAIN. M. B. Curtis Drops in With One

and Does Well.

(From Saturday's Daily.)

Another "coon snow" dropped in on the city yesterday morning and filled the opera house in the afternoon and evening. They arrived by the Miowera under the management of M. B. Curtis, better known as "Sam'l. of Posen." They are on a tour of the world. During their stay here they were under the pilotage of the veteran theatrical man, Robt. L. Scott. He flooded the town with bills and the telephone people reached everybody on the lines. The consequence was that when the curtain went up the house crowded.

The star of the company is Ernest Hogan, the "Unbleached American," who is the author of a number o popular songs, among which is the famous "All Coons Look Alike to Me." the His singing and jokes caught the crowd and he was recalled many times.

The four young buck and wing danc ers were clever and were applauded The other features were the Cubar midget, contortionist dancer, and Madame Hyers, the "Bronze Patti."

The cake walk, however, brought out more applause than anything else This form of entertainment always pleases a Honolulu audience, and the one yesterday was remarkably well ex-

The whole show was good and played to first class houses both in the afternoon and evening.

YELLOW FEVER.

AUSTIN, Texas, May 30.-Dr. Souchon, City Health Officer of New Or leans, today wired State Health Officer W. F. Blunt that yellow fever had re appeared in that city, one death from the disease occurring yesterday.

MAJ. MARCHAND.

PARIS. May 31 .- Maj. Marchand, who planted the French flag at Fashoda, in the Soudan, but withdrew or instructions from Paris, arrived a Toulon today and was given a mos enthusiastic welcome. The explorer is hailed as a hero by all the enemies of the republic. He is contrasted by them with the Foreign Minister, M Delcasse, whose good sense in the Fashoda matter is stigmatized as cow ardice. To pay ovations to Marchand is at once to let loose anglophobe feel-

THE LIVES OF THE OWNERS

"All Knds of People to Make Up World."-Characteristics and Careers Outlined.

Picciola: Your nature is not develed; you are young and inexperiencand are full of vague longings and pirations for the unattained. Are of affectionate, but not especially ate; very hospitable, but not pathetic. A strong desire to trav b because of a thirst rather adventure than knowledge. You position is honorable, but intense by solfish. You will not make a good sther, though your children will sership you and be blind to your Casts. You will be happily married; much more happily than your hus-Take all and give nothing" is the unconscious motto on which your tife lines will run. 000

Seigh Lassie: Practical with considerable common sense. Buoyant spirits, amiable disposition, but critical and discriminating. Fond of the appaste sex, but fastidious in the selection of a life partner. You will marry once, and there will be a rowance in your life which you will serious illnesses, and for a time will be in a precarious condition of health. Your mission in life will lead you slong practical lines of usefulness and help to your associates. 000

Sarab Ann: Proud, haughty and self-complaisant. Much natural abil-Ry, but marred by egotism. Musical, cultivated and entertaining. Fond of athletic amusements. Life line well marked. Not emotional or sentimental, but will fall in love with a man much younger than yourself whom you will not marry. Much travel and wealth are indicated:

Schlitz: A jolly, good-natured, energstic boy; will always be a boy, Changle you live to be ninety. You look on life as a huge loke, and only have the blues on rare occasions. You have numerous adventures, for the saightest incident is fraught with interest to you, and everything is converted into a good story. You marry three times; each time as the result of an ardent heart attack; in all three cases, however, there is money to add zest to the chase. You will be success-Aut in business, and will leave a large fortune to your heirs. At the age of and about this time you meet your second wife. You have remarkable viraffix and resist filness. Your greatest fault is an elastic conscience.

000 Tuppence: Decisive, alert and reestelant Fond of music and art, bu no marked talent for either. Your life fine is well marked, and you can reasoughly expect long life with little sickness and no accidents of serious nature. You forgive, but never forget an injury. You are pious, but not deeply religious. Slight vein of superstition in your nature. A great surrow is evident, and something of a rosiance in your life. Fortune will both smile and frown upon you. Will marry twice; the first time more happily than the second.

000 Coralie: Gentle, confiding and lovable. Affectionate, inconsistent and variable. Fond of ease and comfort, not capable of mental and physical exertion. Good conversationalist, quick at repartee, and with more than ordinary talent for art. Fond of society and a little flirtatious, but will meet your fate and display a depth of elmracter and steadfast devotion heretofore unsuspected. Life line rather broken with ill health and disaster strongly marked in middle life. Your tater years will be spent in peace and comfort, lacking only domesticity on your part to render it perfect.

000 Queen Bee: You are subject to fits of depression amounting even to me! ancholia; have a love affair that is all absorbing. Your past is full of monotony, your present is obscured by doubt and anxious foreboding. Your future gives promise of brightness and good. You will have your greatest prosperity after you are thirty-eight. You have some secret that you are trying to bide; through much brood-* discovered it would not even attain the dignity of a nine days' wonder, und its discovery would bring you re-Bot. A tendency to reserve and seereliveness is a source of unhappiness

NEWARK FOR APIA.

NEW YORK, May 31.—A special to Droggists and Dealers.

the Herald from Washington says: In anticipation of the arrival of the erulser Newark at Valparaise within two or three days, instructions are being prepared at the Navy Departcommanding officer, under which he will act upon his arrival at Apia.

Much as the officials would like to have a regular man-of-war in Samoan waters besides the auxiliary cruiser Badger and the collier Brutus, it has been found impossible to reach Rear-Admiral Kautz with instructions, and it is expected that he will sail in a couple of days for San Francisco.

LIEUT. GILMORE.

WASHINGTON, May 31.- The folowing dispatch, received by the Navy Department, the first direct news of Lieut. Gilmore that has been had for over a week, is taken as a hopeful indication of his situation:

"Manila, May 31,-Secretary of the Navy, Washington: An escaped Spanish prisoner reports seeing Gilmore and some sailors, all well. Gilmore is BARKER." allowed a horse.

RECREATION HALL

McKinley.

Under the direction of Father Valentin of the Catholic Mission, a recreation hall has been established at Waikiki for the soldiers. The place ing originally erected by the Catholic teers. It was built for devotional purposes, and is situated but a short distance from the parracks.

Although the new organization is under the direction of the Catholic carefully treasure. You will have two Fathers, its privileges are open to all. in many places rooting up the coffee It is intended to provide books magazines, chess and other games, and to attend. On Friday evenings there will be regular choir rehearsals for the services on Sunday. There are to be no charges, but every pay day the soldiers are to contribute whatever they feel like giving. Sergt. Smith of Battery A, has been appointed president of the organization. By establishing such a place it is acced to provide a point where the soldlers can off the first erop. pass the time pleasantly.

BRITISH SOLDIERS.

Several Deserted at Malta to Join the Yankee Organizations.

The proverbial desire of the British soldier to be where there was fighting was wen illustrated during the stop of the American transport Sheridan at Malta, where the garrison were dazzled by the Americans' prospect of active duty in the Philippines. "The British garrison fraternized beartily with the visitors, with rather unfortunate results in some cases," says the Civil and Military Gazette, "for when the transport was leaving Malta the thirty-three you go around the world, authorities notified the United States what the report says about the church Commandant that thirteen British soland had probably secreted themselves as stowaways on board. One of the delinquents was soon discovered and was sourceful. Kind, gentle, but slightly Port Said; while, shortly before Cohad in the meantime donned the American uniform, were likewise discovered and were handed over to the military authorities at Colombo. The remaining four deserters, however, have still to be accounted for."

CIVIL SERVICE CONTRACTED.

WASHINGTON, May 29.-President to the civil service rules, which he has had under consideration for about a year. It releases from the operations of the civil service rules about 4000 offices. Among such places are the following: Pension examining surgeons Indians employed in the Indian serv ice, not connected with the Indian school service, and many places in the engineer department at large, quartermaster's department at large, the subsistence department at large, the ordnance department at large of to the places in the outside War Department's service, it is provided that of Spanish Minister at Washington. partment's service, it is provided that they shall be subject to regulations provided by the Secretary of War and ried departure of Senor Polo y Berapproved by the President, thus plac- nabe, April 20, 1898, on the eve of the ing these branches of the service on war between the two countries. the same substantial basis as the Navy Yard service.

IT CURED HER COUGH.

I was seriously afflicted with a cour for several years, and last fall had : more severe cough than ever before I have used many remedies without receiving much relief, and being recommended to try a bottle of Chamberlain's Cough Remedy, by a friend, who knowing me to be a poor widow, gave ing its importance is magnified; were gratifying results. The first bottle reit to me, I tried it, and with the most leved me very much and the second bottle has absolutely cured me. I have not had as good health for twenty years. I give this certificate without solicitation, simply in appreciation of the continuous time of the continuous time of the continuous time of the continuous time of the continuous times. Mary A. Beard, Clarence, Ark. For sale by BENSON SMITH & CO., LTD., ARCHIVELED TO THE CO., ARCHIVELED

ment to be sent to Captain Goodrich. Planting Is In Progress on the Place Already.

Encouraging Figures - Laborers' Quarters-Ploughing is Easy-First Crop 6.000 Acres.

HILO, June 8 .- Hawaii Herald; E A. Horan, who is in charge of the planting interests in Olaa for the present, came down to Hilo on Tuesday on business connected with the company.

"At present we are planting seed in the cleared fields formerly planted in coffee. We have about 106 acres plantnow, and will increase this to 500 as rapidly as possible. We have 200 acres now ready for the cane. The clearing thus far done is only in a general way, and no great amount of this kind of work will be done until the manager is appointed.

"Carpenters have erected laborers" quarters at Mountain View, where 200 Catholic Mission Feature at Camp can be accommodated, and another house will be built at eleven miles. The soil up there is so light that we are plowing fields with six-inch plows and using only a single horse. Where the twelve-inca breaking plow is used occupied for the purpose is the build- a single span of mules can do the work with ease. Just as fast as the Church during the stay of the volun- ground can be plowed it will be planted, and it is expected that not less than 6000 acres will be planted for the first crop.

"There are big gangs of Japanese on the plantation clearing the land, and trees. Four-mule teams are hauling seed cane from below, and this is bewriting material for those who desire ling planted as rapidly as possible, and Contractor James is engaged with other carpenters erecting such buildings as are needed at present. A great many acres have been planted in seed cane, and in nine months this will be ready to cut and plant, and eighteen months afterwards it will be ready to crop. This means that in twenty-seven months Olaa will be ready to take

> "Nothing can be done regarding the selection of a mill site until a manager is appointed.

"I have not heard of any one selling their paid-up stock at par; in the main the people who hold it do so as an investment and not for speculative purposes."

A Church Statement.

(Anglican Church Chronicle.) The annual report of the Society for the Propagation of the Gospel in Foreign Parts for 1898 has just reached It has become a bulky volume. and is filled with interesting accounts of the laborers in the Vineyard in all parts of the world. The following is in Hawaii: "On August 12, 1898, the diers from the garrison had deserted Hawaiian Islands were annexed by the United States of America. Among the results of this memorable event will probably be at no distant date the termade over to the British authorities at mination of the society's connection with the Islands, which commenced in 1862 No change will be made in hurry, or any inconvenience be readily caused to any person, but as the society has never made grants to the missions of the sister church of the united States since the consecration of Bishop Seabury, it will not create a new precedent by maintaining the church work in Honolulu. Perhans indeeed probably-union with the church of the United States may bring about fresh McKinley today issued the amendment extension and development of the church thus acquired by the general convention."

DUKE D'ARCOS.

Spain's New Minister and His Suite Reach New York.

NEW YORK, May 21.—The most notable passenger who, arrived on the North German Lloyd steamship Kaiser Wilhelm der Grosse was the Duke

The new Minister was accompanied on the voyage by his wife, formerly Miss Virginia Woodbury Lowery, ot Washington, and by Senor Juan Riano, who will act as first secretary of the re-established Spanish Legation. The Duke manifested the utmost hopefulness in the results of his mission and spoke reservedly of the out-

ome of the war.
"That is past," he said, "and Spain ooks only to the future."

He was anxious for the latest news of the situation in the Philippines, and apon being asked his opinion of the otcome of the campaign there, he said

"It can have but one result. This country is so powerful it will soon compel the insurgents to surrender. in Spain, are sorry for our soltiers who are prisoners there, but we slieve that Gen. ills. Influences sprang up and pre-valled that brought disaster to their The powers of superstitition and bad government arose and locked hands. There also came in their day the hordes of Asia and the deadly increase of the liquor traffic.

But to these beleaguered men God sent relief, and thanks to Mr. Bicknell, the exposure of Kahunaism, and the rapid growth of our various home

Under the superintendence of that indefatigable worker and man of many machinations, Mr. Frank W. Damon the Chinese mission has become an object lesson to all; and under the lead-ership of Rev. O. H. Gulick, the Japanese work has assumed important re-lations, and the Portuguese mission adds its influence for good. The benefit of these various missions to the native work is already great and constantly growing in importance. But at the head of all these influences stands the powerful aid rendered by our growing English congregations with their able pastors. To this church our missionary board owes its very existence. One feature of great helpfulness in

the work has been the location of missionary superintendents in the field. I know of nothing more hopeful than

what they are doing. In this capacity Mr. Lydgate is carrying on a work of rare advantage on the Island of Kauai. He represents at once a pastors' aid society, by which native pastors are helped to a better living, a theological school in which they get drill in Bible study, in ethics and in sermonizing, and in addition he represents a visiting brother, who, going from parish to parish and from house to house, stirs the native min-isters up to do better pastoral work.

Mr. Richards is undertaking some such work on Oahu, Mr. Lewis on Maul, and Mr. Hill in eastern Hawaii.

One more man is imperatively needed for western Hawaii, to have charge tainly is in for a broken neck along of the populous Konas; give us this with her dramatic triumphs. one additional white man and we shall the better hold the field.

There is one further feature of the work of which I must speak. It is the grain for Hackfeld & Co. dropped anchor in Hilo just previous to the Kimost hopeful. If we keep up our mau's leaving.

schools we shall hold the situation. Could you mark the difference between the trained and untrained Hawalian girl when she becomes a wife and a mother you would not doubt this. Rev. O. P. Emerson on the churches. They will yet lift the native churches to a higher level. Mr. Richard's work with these young men is

proving of great benefit.

But there is one school whose claims What is Being Done and What is of Rev. Mr. Leadingham. I venture to affirm that there is nowhere in the Hawaiian work a more important cen-

ter of influence.

The immediate care of the native churches must be left mainly to native (Address of Rev. O. P. Emerson for pastors, and the more of character and the Hawatian Board. Delivered at the Central Union church Sunday, June 4, 1899.)

development we can give these men, the better will they do their work. The training we give them will decide

its quality.
It is because so many of our natives of the century, after eighty years of missionary work, it is fitting that a of study and discipline that their work

A Big Success.

WASHINGTON, May 30.-Washington dramatic critics are extravagant in praise of Miss Blanche Bates of San Francisco, who appeared here last last night with the Frawley company as the star in "The Dancing Girl." The Times says this morning:

"It is scarcely three months since the scholarly Modfeska, deploring the decline of the modern stage, predicted that ere long an actress would come out of the Far West to startle the world with her infinite genius and to establish a new standard of perfect art. lime since then has given the proof of her prophecy, and the metropolis, though tardy, indeed, to recognize merit, has pronounced the fulfillment of the prediction of the Polish artist.

"Washington last evening stamped with its seal of genuine approval the verdict of the remainder of the East, and a new Queen reigns in professionalism, as far as the national capital is concerned, in the person of Miss Blanche Bates, whose coronation took place at the Columbia last evening, T. Daniel Frawley standing as sponsor, and a goodly portion of theatrical Washington applauding the ceremonies incident to the realization of Miss Bates' youthful dreams."

The Washington Post praises Miss Bates at great length, tells all about her stage history, and prints a doublecolumn picture of her in the great stair-falling act. If Miss Bates falls downstairs every night this week the way she did last night she most cer-

Cyclist Martin Injured in Australia.

Ribs Broken-Severe Bruises-Head Hurt - Disabled for Months-Was in Great Form.

SYDNEY, Australia.-William Martin made his reappearance on the Australian tracks on Saturday, April 15th. at a meet held in Melbourne. The racing attracted 5000 spectators in the afternoon and 10,000 in the evening. The form displayed by Martin was exceptionally fine. He announced himself as feeling better than ever before and his riding fully bore out his statement. He won two qualifying heats during the afternoon, the crowd giving him a splendid reception on each oc

MARTIN MEETS WAINE.

Both Waine and Martin won their heats in the mile scratch, and the final saw those two champions matched against each other with three other good riders in Don Walker, R. W Lewis and A. C. Forbes. Martin had preachers. We ask you to help us train ridden in several of the other events during the day, while Waine had savwhich comes to us from western ed himself. F. Hunt was put in to islands for missionaries. It were worth pace. Martin caught his rear wheel ed himself. F. Hunt was put in to and Waine hooked on behind "Plugger Bili." The positions remained the same until the bell, when Hunt retired, leaving Martin with the lead and with 200 yards to go. Martin made a sudden jump, gaining a length and a half. Waine closed the gap and a rattling finish ensued, won by Waine by a wheel from the popular American. Both riders came in for a terrifle ovation for their splendid riding.

> THE EIGHT HOUR MEET. The Druids' annual meet was held on the Exhibition track in Melbourne on Friday, April 21st, and Saturday, April 22d. Martin, with his fortnight's training after landing, rode at his best. On the first day he ran a dead heat with McDonald in the five-mile scratch. This was one of the fines

> finishes yet seen in Victoria. In the international flying competition quarter-mile record race the American gained third place, Waine winning in 27 1-5 seconds, and Barker taking second in 27 3-5.

MARTIN DANGEROUSLY INJURED On the concluding day of the meet the popular American outshone himself. He started five times in preliminary heats, won three and was going for his fourth victory when a frightful spill occurred. Martin, together with eight others started for the final of the half-mile handicaps. Starting from the post of honor Martin soon caught his field. In the last lap, as the field Of the 120 and more natives who cannot be too grateful for this since I swept round into the back stretch, were ordained—about half of whom now enjoy good sleep—one of the chief are living—over thirty, or one-fourth of Nature's blessings." Crowell and Corbett immediately in front of him, cried, "Open out." Corbett swerved out towards Crowell, and. their handles becoming locked, they the fence. Owing to his feet being strapped to the pedals, he could not leap off as he had done on previous occasions, when in the same predicament. The force with which he struck the fence bent the rail and made him rebound into the middle of the track, where he lay unconscious. Corbet: and Crowell lay where they fell, and together with Martin were removed to

> Dr. Hodgson, who examined Martin. declared that three ribs under the right shoulder blade were broken. while symptoms of concussion of the brain were present. There was also an ugly gash just over the right hip. and a broken bone in the right foot, while the muscles of his back were considerably torn, besides numerous other abrasions all over the body. The full extent of his internal injuries could not be ascertained, owing to the swollen state of the right shoulder. Poor Martin, for whom sympathy is expressed all over Australia, will not be able to appear on the tracks for months, and all his engagements have been canceled.

the casualty room.

Corbett and Crowell were both frightfully knocked about, but no bones were broken.

On Monday, two days after the accident, Martin was slightly easier, although the medical men were still unable to tell the full extent of his injuries. His case is regarded as a very

ONE APPLICATION RELIEVES THE PAIN.

What is Being Done and What is Required-A Review of Eighty Years-Institutions.

(Address of Rev. O. P. Emerson for the Hawaiian Board. Delivered at the Central Union church Sunday, June 4, 1899.)

Standing as we do close to the close of the century, after eighty years of are lacking in the elements that come missionary work, it is fitting that a of study and discipline that their work survey be made of that work, even though it be a mere glance, to the end

that its needs be better understood. These eighty years of the mission divide into two periods of nearly equal length.

The first is that of the activity of the gathering—wonderful years, when HaBesides training our native pastors wall first felt the warmth of day after

wallans a written language and a litthat language and literature and in- them here. augurated a school system which has out of depths of degradation and mis-

They found the people idle and they as heretofore, invoking your powerful gave them employment. Mind and aid. heart were engaged; they became themselves in turn light-bearers to yet unevangelied islanders; and finally, having raised up a body of men to take their place, the fathers passed on.

The second period into which these

eighty years are divided is overlapped by the first, but may be regarded as commencing in 1863, when out of the old "General Meeting" and "Evangelical Association" of the fathers, was formed the "Evangelical Association"

of today.

This latter period is marked as being that of the administration of the Ha-

walian pastors.
Out of the nineteen old missionary parishes were formed fifty-seven smal-ler ones, placed under the charge of native pastors.

During the earlier years of their service they had the loving supervision of the yet remaining fathers, but soon Mrs. Grace Dodd of 524 Young screet

field.

were ordained—about half of whom now enjoy good sleep—one of the chief Martin, who was lying third on the are living—over thirty, or one-fourth of Nature's blessings."

the home field, were beset by a flood of Hollister Drug Co., Honolulu, wholesale ills. Influences sprang up and pre-vailed that brought disaster to their work. The powers of superstitition and bad government arose and locked hands. There also came in their day the hordes of Asia and the deadly increase of the liquor traffic.

But to these beleaguered men God sent relief, and thanks to Mr. Bick-nell, the exposure of Kahunaism, and the rapid growth of our various nome missions.

Under the superintendence of that indefatigable worker and man of many machinations, Mr. Frank W. Damon, the Chinese mission has become an object lesson to all; and under the leadership of Rev. O. H. Gulick, the Japanese work has assumed important relations, and the Portuguese mission adds its influence for good. The benefit of these various missions to the native work is already great and constantly growing in importance. But at the head of all these influences stands the powerful aid rendered by our growing English congregations with their able pastors. To this church our missionary board owes its very existence.

One feature of great helpfulness in the work has been the location of missionary superintendents in the field. I know of nothing more hopeful than

what they are doing.

In this capacity Mr. Lydgate is carrying on a work of rare advantage on the Island of Kauai. He represents at once a pastors' aid society, by which native pastors are helped to a better living, a theological school in which they get drill in Bible study, in ethics and in sermonizing, and in addition he represents a visiting brother, who, going from parish to parish and from Bates at great length, tells all about house to house, stirs the native min-

inters up to do better pastoral work.

Mr. Richards is undertaking some such work on Oahu. Mr. Lewis on Maui, and Mr. Hill in eastern Hawaii.

One more man is imperatively needed for western Hawaii, to have charge tainly is in for a broken neck along of the populous Konas; give us this with her dramatic triumphs. one additional white man and we shall the better hold the field.

There is one further feature of the work of which I must speak. It is the educational work and one which is anchor in Hilo just previous to the Kimost hopeful. If we keep up our nau's leaving.

schools we shall hold the situation. Could you mark the difference between the trained and untrained Hawaiian Rev. O. P. Emerson on the

Home Mission Labors.

Che trained and untrained Hawaitan girl when she becomes a wife and a mother you would not doubt this. Trained youth are the hope of the churches. They will yet lift the native churches to a higher level. Mr. Richard's work with these young men is proving of great benefit.

But there is one school whose claims I would verse above every other. I re-

I would urge above every other. I re-fer to the N. P. M. I., now in the charge of Rev. Mr. Leadingham. I venture to affirm that there is nowhere in the Hawaiian work a more important cen-

ter of influence.

The immediate care of the native churches must be left mainly to native pastors, and the more of character and development we can give these men, the better will they do their work. The training we give them will decide

its quality.
It is because so many of our patives

goes so haltingly.

Our first requirement then for an advance towards better things, so far as the Hawaiians are concerned, is a well-equipped theological school.

One man is not sufficient to this work. Mr. Leadingham needs an associate whose entire time and strength shall be devoted to the school; to get missionary fathers—years of planting such a man we ask for an endowment and of growth—years of fruitage and that shall guarantee a sufficient and

waii first felt the warmth of day after its long night of darkness.

Do you ask what the fathers did to bring the day? They gave the Hawaiians a written language and a literal second a place for the training of Portuguese and Chinese workers, It might also become a place for the training of Portuguese and Chinese workers. It might also become a training second for much needwaiians a written language and a lit-erature with a Bible in it, they taught preachers. We ask you to help us train ridden in several of the other events

Moreover there is a Matedonian cry been the pride of Hawaii; they built which comes to us from western a score of great churches and made islands for missionaries. It were worth them centers of religious life; they our while to build up this school if gave the people the Sabbath and the only to prepare a body of men to meet marriage rite, and giving them a church and a home-life they drew them in need of an efficient theological

BACKACHE KIDNEY PILLS. In the service of the swerved out towards Crowell, and their handles becoming locked, they fell violently, and Martin dashed into the fence. Owing to his feet being the service of the service of the swerved out towards Crowell, and their handles becoming locked, they fell violently, and Martin dashed into the service of fell violently, and Martin dashed into strapped to the pedals, he could not leap of as he had done on previous occasions, when in the same predicament. The force with which he struck the fence bent the rail and made him rebound into the mindle of the track, where he lay unconscious. Corbett and Crowell lay where they fell, and together with Martin were removed to the casualty room.

Dr. Hodgson, who examined Martin, declared that three ribs under the right shoulder blade were broken. while symptoms of concussion of the brain were present. There was also an ugly gash just over the right hip. and a broken bone in the right foct, considerably torn, besides numerous full extent of his internal injuries could not be ascertained, owing to the swollen state of the right shoulder. Poor Martin, for whom sympathy is expressed all over Australia, will not be able to appear on the tracks for months, and all his engagements have been canceled.

Corbett and Crowell were both frightfully knocked about, but no bones were broken

On Monday, two days after the accident. Martin was slightly easier, alrics. His case to regarded as a very serious one

ONE APPLICATION RELIEVES THE PAIN.

Mr. P. Ketcham of Pike City, Cal. says: - "During my brother's late sick ness from sciatic rheumatism, Cham berlain's Pain Balm was the only remedy that gave him any relief." Many others have testified to the prompt retef from pain which this liniment af fords. For sale by

BENSON SMITH & CO., LTD., Agents for Hawaiian Islands and al Druggists and Dealers.

With clean, wholesome Scalp, free from itching, bleeding, and scaly eruptions, produced by warm shampoos with Curreuna Soar, and frequent dressings with Curreuna, greatest of emollients and purest of skin cures. This treatment clears the scalp and hair of crusts, scales, and dandruff, soothes irritated and itching surfaces, stimulates the hair follicles, nourishes the roots and makes the hair thick, soft, and glossy.

California Fertilizer Works

J. E. MILLER, MANAGER.

MANUFACTURERS OF PURE BONE FERTILIZERS AND PURE BONE MEAL.

Fertilizer Materials! OF EVERY DESCRIPTION.

Have constantly on hand the following goods adapted to the Island trade;

HIGH GRADE CANE MANURE, FERTILIZERS, NITRATE OF SODA, SULPHATE OF AMMONIA. HIGH GRADE SULPHATE OF POTASH.

FISH GUANO, WOOL DUST, ETC Spicial Manures Manufactured to Order-

The manners manufactured by the California Fertilizes Works are made entrees from clean bone treated with acid. Dry Ricod and Flesh, Potash and Magnesia salts. No adulteration of any kind is used, and every ton is soid under a guaranteed andysis. One ton or one thousand ions are almost exactly slike, and for excellent method condition and high analysis have no superior in the market.

The superior ty of Fure Bone over at y other Phosphatic Material for Fertilizer casts so well known that it needs no explanation.

The large and constantly increasing demand for the Fertilizers manufactured by the California for Fertilizer Works is the best possible phoof of their superior quality.

A Stock of these Pertilizers will be kept Constantly on Hand and for sale on the usual terms, by

C. Brewer & Co., Ltd.

HONOLULE AGENTS CALIFORNIA FERTILIZER WORKS.

VEDETTE WHEELS

Are good wheels; they are made by the makers of the great COLUMBIA wheel. BANANA BREAD

One of the Common Foods in West Indies.

Process of Preparation-Rich srand More Nutritious Than the Ordinary Wheat Bread.

(St. Louis Globe-Democrat.)

A common article of food in the West Indies is a flour made from the bread fruit. The fruit is cut into "pegs" or strips and dried in the sun. then ground to powder in a mortar and sifted. This flour makes a very convenient and highly nutritious addition to the hamper of provisions the negro usually takes with him when travelling far from his home, and he well knows the art of making it into a variety of appetizing dishes. The plantain is coffee. sweeter and richer flour than either the plantain or the bread fruit. It is estimated that the banana has 44 times more nutritious value than the potato and is 25 times more nutritious than good white bread. This fact has induced the French government to send Holt. a commission to the United States and Central America with a view of investigating the adaptability of the banana plant for extensive agricultural operations in the Congo in the production of cheap food for the working classes in Belgium. Should this commission report favorably on the subject of their investigation, a new and vast industry will be established, which interests the United States very closely, from the fact of Porto Rico and Cuba possessing hundreds of thousands of acres on which the finest varieties of the banana can be successfully grown. It is highly probable that another industry will grow up from the association of this country with the West Indies. The banana in its candied form is a delicious sweetmeat. Many people prefer it infinitely to dried figs. It is simply made. The ripe banana is cut into thin slices and laid in the tropical sun until it becames a sweet, semigelatinous mass. The slices are packed in boxes with a dusting of fine sugar between each layer, and are ready for shipment. This process, though not elaborate, requires care and watchfulness, without which the product may be inferior and unattractive. But if the curing and packing are properly done and cured fruit is put on the American market, it is not improbable that it will soon take the place of the fig for dessert purposes.

SIX MASTS.

Proposal for Schooner With flait a D zen Sticks.

H. M. Bean, the well-known shipping man of Camden, Me., is an advocate of the six-masted schooner. It has Walakea sugar, 9000 Pepeekeo, been thought that the five-master marked the limit, but Mr. Bean thinks a six-master would be easy to handle, a fast sailer, and a money earner. He expects to see just such a vessel built in his yard within two years. Such a vessel would cost about \$140,000. The Company, 750,000 From Port Townsend to H. Hackfeld & I company, 750,000 For of Jumber. vessel would cost about \$140,000. The Company: 750,000 feet of lumber. six masts would be of an equal length, 225 feet each, and when all the canvas 7, sehr. H. C. Wright, lumber laden from the Sound. six masts would be of an equal length, 125 feet each, and when all the canvas vas spread there would be about 13,690 square yards, or enough to clothe 2000 soldiers. In length she would be 325 feet over all, 47 feet in beam, with a 22-foot hold. Mr. Bean argues that if a five-master can return some 20 per cent, profit to her owners in a year, a six-master, with a larger tonnage, run-ning under practically the same expense, would yield a bigger percentage of profit. As shown by the records of other schooners, there is a possibility of her making 188 trips a year, thus carrying 99,000 tons of coal. Averag-ing 70 cents per ton, trimming included, the gross earnings for a year would be \$69,300, 70 per cent on the original investment. Mr. Bean estimates the total expense at \$21,800, leaving a profit of \$47,800, or over 47 per cent. surance on vessels averages about 7 Karoo, Br. ship Shanghai per cent, and there would be left a net Matteawan, Am. stur. Norfo'k profit of better than 40 per cent. Some of the Bath builders do not take so rosy a view of the subject, and think that the five-master is the limit for a wooden vessel.

Oceanic S. S. Bonds.

On the 2nd inst., at San Francisco, a meeting of the directors of the Oceanic S. S. Co. was held to consider and act upon the proposition that said company create a bonded indebtedness of two million five hundred thousand dojlars (\$2,500,000), in United States gold coin, for the purpose of raising money to complete the construction of its steamships and their equipment, for use in the business of this corporation and to purchase and pay for any other property within the purposes of this company: and to secure the bonded in-debtedness so proposed to be created by a mortgage upon its steam and sail-ing voicels and all other property of said company now owned or horsefter to be acquired by said company

WHATE AND WAVE.

The China, from San Francisco, due Thursday afternoon

The British-American freighter Por Albert was expected to sail from Seat-tic about June 10th for this port.

The big steel ship Erskine M Phelps sailed for New York on Satur day with a full cargo of sugar. The steamer Claudine arrived Satur

day morning with the usual Maui proluce and returns hence this afternoon The Australia for San Francisco this afternoon will carry the usual cargo of bananas, rice and sugar. The Nippon Maru's delayed arrival will give her an unusually large passenger list.

The brig W. G. Irwin is again it port with general cargo from San Francisco. Capt. Williams will load ugar as soon as his load is discharged and receive quick despatch for the

The Toyo Kisen Kaisha liner Nippon Maru, now overdue from Yokohama for San Francisco, has been probably delayed by the heavy weather now pre-vailing in the Pacific Ocean west of

The bark McNear with guano from aysan Island anchored in the stream late yesterday afternoon. The McNear sailed from Honolulu April 15th and has been nearly two months making the round trip. She brings a number of Japanese laborers who have been working in the guano beds of Laysan Island some time.

The Iwalani from Kukuihaele yesterlay morning reports very bad weather at Honokaa but her freight was landed successfully on last Saturday and on Sunday she took on a small cargo of Kukuihaele sugar. Very little rain at Honokaa and Kukuihaele. The Kilo-hana was at Honuapo discharging freight when the Iwalani sailed. Good weather at Kau. No rain.

The Japanese composite cruiser Hi-yei, one of the training ships of the Imperial Japanese navy, may arrive the latter end of this month from San Diego. She will make a lengthy stay and is due at Yokohama in September The Hiyei has been cruising along the coast of North America since last April calling at Esquimault, Seattle, l'acoma, San Francisco and San Diego

Steamer Mattewan, 2499 tons, built at South Shields, E., in 1893, and hailing from New York, has been sold by T. Hogan & Sons to a Pacific Coast Steamship Co. She was formerly the British steamer Asturian Prince. Steamer Miami, 2292 tons, built at Sunderland in 1891, and hailing from New York, has also been sold to the same parties. She was formerly the British steamer Nerito. The sale was made through Samuel Holmes, of New York, and the selling price was \$500, 000.-Marine Register.

BANANA BREAD

One of the Common Foods in West Indies.

Process of Preparation-Rich or and More Nutritious Than the Ordinary Wheat Bread.

(St. Louis Globe-Democrat.)

A common article of food in the West Indies is a flour made from the bread fruit. The fruit is cut into "pegs" or strips and dried in the sun, then ground to powder in a mortar and sifted. This flour makes a very convenient and highly nutritious addition to the hamper of provisions the negro usually takes with him when travelling far from his home, and he well knows the art of making it into a variety of appetizing dishes. The plantain is sometimes treated in the same way, as well as the banana, which gives a sweeter and richer flour than either the plantain or the bread fruit. It is estimated that the banana has 44 times and is 25 times more nutritious than good white bread. This fact has in- feld & Co; 250 bags rice to H. von duced the French government to send Holt. a commission to the United States and Central America with a view of investigating the adaptability of the banana plant for extensive agricultural operations in the Congo in the production of cheap food for the working classes in Belgium. Should this commission report favorably on the subject of their investigation, a new and vast industry will be established, which interests the United States very closely, from the fact of Porto Rico and Cubs possessing hundreds of thousands of acres on which the finest varieties of the banana can be successfully grown. It is highly probable that another industry will grow up from the association of this country with the West Indies. The banana in its candled form is a delicious sweetmeat. Many people prefer it infinitely to dried figs. It is simply made. The ripe banana is cut into thin slices and laid in the tropical sun until it becames a sweet semigelatinous mass. The slices are packed in boxes with a dusting of fine sugar between each layer, and are ready for shipment. This process, though not elaborate, requires care and watchfulness, without which the product may be inferior and unattractive. But if the curing and packing are properly done and cured fruit is put on the American market, it is not improbable that it will soon take the place of the fig for dessert purposes.

SIX MASTS.

Proposal for Schooner With Half a D. zen Sticks.

H. M. Bean, the well-known shipping man of Camden, Me., is an advocate of the six-masted schooner. It has marked the limit, but Mr. Bean thinks a six-master would be easy to handle, Francisco. To sail this week, bktn. a fast sailer, and a money earner. He Archer, for San Francisco. Arrived, expects to see just such a vessel built in his yard within two years. Such a vessel would cost about \$140,000. The six masts would be of an equal length, 125 feet each, and when all the canvas was spread there would be about 13,690 square yards, or enough to clothe 2000 soldiers. In length she would be 325 feet over all, 47 feet in beam, with a 22-foot hold. Mr. Bean argues that if a five-master can return some 20 per cent, profit to her owners in a year, a six-master, with a larger tonnage, running under practically the same expense, would yield a bigger percentage of profit. As shown by the records of other schooners, there is a possibility of her making 188 trips a year, thus carrying 99,000 tons of coal. Averaging 70 cents per ton, trimming included, the gross earnings for a year would be \$69,300, 70 per cent on the original investment. Mr. Bean estimates the total expense at \$21,800, leaving a profit of \$47,800, or over 47 per cent. surance on vessels averages about 7 per cent, and there would be left a net profit of better than 40 per cent. Some of the Bath builders do not take so rosy a view of the subject, and think that the five-master is the limit fo a wooden vessel.

Oceanic S. S. Bonds.

On the 2nd inst., at San Francisco, a meeting of the directors of the Oceanic S. S. Co, was held to consider and an upon the proposition that said comtwo million five hundred thousand dollars (\$2,500,000), in United States gold coin, for the purpose of raising money to complete the construction of its steamships and their equipment, for use in the business of this corporation and to purchase and pay for any other property within the purposes of this company; and to accure the bonded indebtedness so proposed to be created by a mortgage upon its steam and sail ing vessels and all other property of said company now owned or hereafter to be acquired by said company

NOTICE TO SHIPMASTERS.

U. S. Branch Hy rographic Office. San Francisco, Cal

By communicating with the Branch Hydrographic Office in San Francisco captains of vessels who will co-operate with the Hydrographic Office by recording the meterological observa tions suggested by the office, can have forwarded to them at any desired port. and free of expense, the monthly pilot charts of the North Pacific Ocean and the latest information regarding the tangers to navigation in the waters which they frequent.

Mariners are requested to report to he office dangers discovered, or any other information which can be utilized for correcting charts or sailing directions, or in the publication of the pilet charts of the North Pacific.

W. S. HUGHES Lieutenant, United States Navy

WHARF AND WAVE.

The China, from San Francisco, is iue Thursday afternoon. The British-American freighter Por

Albert was expected to sail from Seat e about June 10th for this port. The big steel ship Erskine M Phelps salled for New York on Satur

day with a full cargo of sugar. The steamer Claudine arrived Satur-

day morning with the usual Maui produce and returns hence this afternoon. The Australia for San Francisco this afternoon will carry the usual cargo of bananas, rice and sugar. The Nippon Maru's delayed arrival will give her an unusually large passenger list.

The brig W. G. Irwin is again in port with general cargo from San Francisco. Capt. Williams will load sugar as soon as his load is discharged and receive quick despatch for

The Toyo Kisen Kaisha liner Nippor laru, now overdue from Yokohama for San Francisco, has been probably de-layed by the heavy weather now prevailing in the Pacific Ocean west of the Islands.

The bark McNear with guano from Laysan Island anchored in the stream late yesterday afternoon. The McNear sailed from Honolulu April 15th and has been nearly two months making the round trip. She brings a number of Japanese laborers who have been working in the guano beds of Laysan Island

The Iwalani from Kukuihaele yesterday morning reports very bad weather at Honokaa but her freight was landed uccessfully on last Saturday and on 5251-2078 Sunday she took on a small cargo of Kukuihaele sugar. Very little rain at Honokaa and Kukuihaele. The Kilo-hana was at Honuapo discharging freight when the Iwalani sailed. Good weather at Kau. No rain.

The Japanese composite cruiser Hi yei, one of the training ships of the Imperial Japanese navy, may arrive the latter end of this month from San Diego. She will make a lengthy stay and is due at Yokohama in September. The Hiyel has been cruising along the coast of North America since last April calling at Esquimault, Seattle l'acoma, San Francisco and San Diego

Steamer Mattewan, 2499 tons, built at South Shields, E., in 1893, and halling from New York, has been sold by T. Hogan & Sons to a Pacific Coast Steamship Co. She was formerly the British steamer Asturian Prince. Steamer Miami, 2292 tons, built at Sunderland in 1891, and hailing from New York, has also been sold to the same parties. She was formerly the British steamer Nerito. made through Samuel Holmes, of New York, and the selling price was \$500,-00.-Marine Register

IN THE CIRCUIT COURT OF THE

FIRST CIRCUIT, HAWAIIAN ISLANDS. in the matter of the estate of Inga L. Bergersen and guardianship of M.

W. M. Bergersen, minor. On reading and filing the petition of William A. Bowen, administrator and guardian of said estate and said minor, praying for an order of sale of certain real estate belonging to said estate and said minor, situate on the east corner of Heulu and Keeaumoku streets, in Honolulu. Oahu, and setting forth certain legal reasons why such real es-

tate should be sold. It is hereby ordered, that all persons interested in the said estate, appear before this Court on Friday, the 30th day of June, A. D. 1899, at 10 o'clock . m., at the Court Room of this Court. in Honolulu, Oahu, then and there to show cause why an order should not

be granted. Honolulu, H. I., June 7th, 1899.

By the Court: GEORGE LUCAS,

IN THE CIRCUIT COURT OF THE FIRST CIRCUIT, HAWAHAN

ISLANDS. Martha Dunleavy vs. Frank Jay Dunleavy.

The Republic of Hawaii:

To the Marshal of the Hawaiiat Islands, or his Deputy, Greeting: You are commanded to summon Frank Jay Dunleavy, defendant in case he shall file written answer with-in twenty days after service hereof, to be and appear before the said Circuit Court at the May term thereof, to be holden at Honolulu, Island of Oahu, on Monday, the 1st day of May next, at 10

o'clock a. m., to show cause why the claim of Martha Dunleavy, plaintiff should not be awarded to her pursuant to the tenor of her annexed petition. And have you then there this writ with full return of your proceedings

Witness Hon. A. Perry, First Judge of the Circuit Court of the First Circuit, at Honolulu, Oahu, this 22d day of March, 1899. GEORGE LUCAS. (Signed)

I certify the foregoing to be a true copy of the original summons in said cause, and that said Court ordered publication of the same and a continu-ance of said cause until the next Aug-ust term, 1899, of this Court. J. A. THOMPSON,
